

‘new’ Englishes

- Spoken in US, Canada, Australia, New Zealand, and South Africa
- Developed independently of and differently from British English, due to 1) mixture of dialects and accents of the early settlers; and 2) influence of the languages of the indigenous locals
- Direct decadence from British English + spoken as mother tongues → strong element of continuity in use

The Variability of Current World Englishes Eugene Green, Charles F. Meyer, 2014-08-27 Faces of English explores the phenomenon of increasing dialects varieties and creoles even as the spread of globalization supports an apparently growing uniformity among nations The book's chapters supply descriptions of Jamaican English in Toronto English as an L2 in a South African mining township Chinese and English contact in Singapore unexpected emergent variants in Canadian English and innovations in the English of West Virginia Further the book offers some perspective on internet English as well as on abiding uniformities in the lexicon and grammar of standard varieties In the analyses of this heterogeneous growth such considerations as speakers sociolinguistic profiles phonological morpho syntactic and lexical variables frequencies and typological patterns provide ample insight in the current status of English both in oral and electronic communities The opening chapter presents a theoretical framework that argues for linguistic typology as conceptually resourceful in accommodating techniques of analysis and in distinguishing the wide arrays of English found throughout the globe One clear function for Faces of English is that of a catalyst to spur studies of diversities in English and in other languages to suggest approaches to adapt to invite counterargument and developments in analysis

Register Variation in Indian English Chandrika Balasubramanian, 2009 Register Variation in Indian English constitutes the first large scale empirical investigation of an international variety of English Using a combination of the corpus compiled for this project and relevant sections of ICE India as its database this work tests existing descriptions and characterizations of English in India and provides the first empirical account of register variation in Indian English or indeed any international variety of English Included in this survey are linguistic features that have been examined before and others that have not From an empirical standpoint it comments on the process of Indianization of the English used in India The book will be of interest to readers beyond specialists of Indian English as it is one of very few studies to undertake a large scale corpus analysis for the purpose of dialect research The book provides a model on which future studies of international Englishes can be based

The Dynamics of Linguistic Variation Terttu Nevalainen, 2008 Variability is characteristic of any living language This volume approaches the life cycle of linguistic variability in English using data sources that range from electronic corpora to the

internet In the spirit of the 1968 Weinreich Labov and Herzog classic the fifteen contributions divide into three sections each highlighting different stages in the dynamics of English across time and space They show first how increase in variability can be initiated by processes that give rise to new patterns of discourse which can ultimately crystallize into new grammatical elements The next phase is the spread of linguistic features and patterns of discourse both new and well established through the social and regional varieties of English The final phase in this ebb and flow of linguistic variability consists of processes promoting some variable features over others across registers and regional and social varieties thus resulting in reduced variation and increased linguistic homogeneity
