ESORICS 2024 International Workshops** Joaquin Garcia-Alfaro,Ken Barker,Guillermo Navarro-Arribas,Cristina Pérez-Solà,Sergi Delgado-Segura,Sokratis Katsikas,Frédéric Cuppens,Costas Lambrinoudakis,Nora Cuppens-Boulahia,Marek Pawlicki,Michał Choraś,2025-04-01 This two volume set LNCS 15263 and LNCS 15264 constitutes the refereed proceedings of eleven International Workshops which were held in conjunction with the 29th European Symposium on Research in Computer Security ESORICS 2024 held in Bydgoszcz Poland during September 16 20 2024 The papers included in these proceedings stem from the following workshops 19th International Workshop on Data Privacy Management DPM 2024 which accepted 7 full papers and 6 short papers out of 24 submissions 8th International Workshop on Cryptocurrencies and Blockchain Technology CBT 2024 which accepted 9 full papers out of 17 submissions 10th Workshop on the Security of Industrial Control Systems and of Cyber Physical Systems CyberICPS 2024 which accepted 9 full papers out of 17 submissions International Workshop on Security and Artificial Intelligence SECAI 2024 which accepted 10 full papers and 5 short papers out of 42 submissions Workshop on Computational Methods for Emerging Problems in Disinformation Analysis DisA 2024 which accepted 4 full papers out of 8 submissions 5th International Workshop on Cyber Physical Security for Critical Infrastructures Protection CPS4CIP 2024 which accepted 4 full papers out of 9 submissions 3rd International Workshop on System Security Assurance SecAssure 2024 which accepted 8 full papers out of 14 submissions   Next-Generation Enterprise Security and Governance Mohiuddin Ahmed,Nour Moustafa,Abu Barkat,Paul Haskell-Dowland,2022-04-19 The Internet is making our daily lives as digital as possible and this new era is called the Internet of Everything IoE The key force behind the rapid growth of the Internet is the technological advancement of enterprises The digital world we live in is facilitated by these enterprises advances and business intelligence These enterprises need to deal with gazillions of bytes of data and in today s age of General Data Protection Regulation enterprises are required to ensure privacy and security of large scale data collections However the increased connectivity and devices used to facilitate IoE are continually creating more room for cybercriminals to find vulnerabilities in enterprise systems and flaws in their corporate governance Ensuring cybersecurity and corporate

governance for enterprises should not be an afterthought or present a huge challenge In recent times the complex diversity of cyber attacks has been skyrocketing and zero day attacks such as ransomware botnet and telecommunication attacks are happening more frequently than before New hacking strategies would easily bypass existing enterprise security and governance platforms using advanced persistent threats For example in 2020 the Toll Group firm was exploited by a new crypto attack family for violating its data privacy where an advanced ransomware technique was launched to exploit the corporation and request a huge figure of monetary ransom Even after applying rational governance hygiene cybersecurity configuration and software updates are often overlooked when they are most needed to fight cyber crime and ensure data privacy Therefore the threat landscape in the context of enterprises has become wider and far more challenging There is a clear need for collaborative work throughout the entire value chain of this network In this context this book addresses the cybersecurity and cooperate governance challenges associated with enterprises which will provide a bigger picture of the concepts intelligent techniques practices and open research directions in this area This book serves as a single source of reference for acquiring the knowledge on the technology process and people involved in next generation privacy and security
