commonly said that it takes 21 days to make a habit stick With that in mind each skill will take several weeks to ingrain in
your mind and body and that is only if you practice them every single day Fortunately you can work on several skills at a time
There will be plenty of opportunities every day that you can apply your new emotional intelligence tools to and many of these
opportunities allow you to practice more than one skill Others are more situational and it could take even longer before you
have the opportunity to really work on them For example practicing cultural social awareness is going to be based on how
often you are exposed to other cultures If you are feeling overwhelmed or think that it is downright impossible break it down
into a step by step plan for yourself Rather than focus on the overall goal and the big picture try setting smaller goals for
yourself The best way to set a goal is to write down your overall goal for example increasing your chances of success Then
you ll want to write down three steps to take in order to reach that goal such as improving EQ getting a better job establish a
long term romantic relationship Once you have your three steps written out break each of them into three smaller steps This
book covers EQ Skills That Will Help Your Career Why EQ is Critical for Successful Leadership Using Emotion to Solve
