## **Making Aid Work:**

Making Aid Work Abhijit Vinayak Banerjee, 2007-03-23 An encouraging account of the potential of foreign aid to reduce poverty and a challenge to all aid organizations to think harder about how they spend their money With more than a billion people now living on less than a dollar a day and with eight million dying each year because they are simply too poor to live most would agree that the problem of global poverty is our greatest moral challenge The large and pressing practical question is how best to address that challenge Although millions of dollars flow to poor countries the results are often disappointing In Making Aid Work Abhijit Banerjee an aid optimist argues that aid has much to contribute but the lack of analysis about which programs really work causes considerable waste and inefficiency which in turn fuels unwarranted pessimism about the role of aid in fostering economic development Banerjee challenges aid donors to do better Building on the model used to evaluate new drugs before they come on the market he argues that donors should assess programs with field experiments using randomized trials In fact he writes given the number of such experiments already undertaken current levels of development assistance could focus entirely on programs with proven records of success in experimental conditions Responding to his challenge leaders in the field including Nicholas Stern Raymond Offenheiser Alice Amsden Ruth Levine Angus Deaton and others question whether randomized trials are the most appropriate way to evaluate success for all programs They raise broader questions as well about the importance of aid for economic development and about the kinds of interventions micro or macro political or economic that will lead to real improvements in the lives of poor people around the world With one in every six people now living in extreme poverty getting it right is crucial

*How Ordinary People Make Aid Work* Stefan Kruse, 2025-10-07 How community organizations and civic engagement drive the success of global health aid What makes health related development assistance truly effective In *How Ordinary People Make Aid Work* Stefan Kruse argues that the answer lies in the power of ordinary citizens By examining the role of community organizations and social movements Kruse challenges conventional approaches to aid showing that true accountability requires more than institutional reforms or participatory spaces that offer citizens a seat at the table Through rigorous analysis and compelling case studies the book reveals how traditional forms of exercising voice especially in politically challenging contexts drive the success of donor funded health projects Kruse demonstrates that reducing infant mortality since the 1990s owes more to an engaged citizenry than to formal accountability mechanisms Surprisingly state capacity and democratic institutions show little effect on the success of health aid once citizen involvement is accounted for By bridging macroeconomic studies of aid effectiveness with research on political behavior these findings underscore the indispensable role of civic engagement in building resilient health systems *How Ordinary People Make Aid Work* critiques the limitations of traditional top down development models and advocates for empowering communities to lead their own progress It highlights how social ties and collective action equip citizens to oversee health projects and create sustainable solutions to public health challenges
