Making European Merger Policy More Predictable:

Making European Merger Policy More Predictable Stefan Voigt, André Schmidt, 2005 Analyses European Merger Control with regard to its capacity to generate predictability among the concerned parties The authors show both theoretically and empirically that there have been serious shortcomings with regard to the predictability of competition policy They assess the reforms of European Merger Control *Does EU Merger Control Discriminate Against Small Market Companies?* Mika Oinonen, 2010-01-01 Although the question posed by the title of this book has generated considerable debate the essential issue remains open and largely blurred While some believe that there is no so called small market problem others discern discrimination against small market companies i e companies with a strong position in their home markets but a modest position in the European and global markets and a consequent need for changes in competition law The author of this enormously helpful work here sets the stage for meaningful discussion by analysing the EC Merger Regulation s objectives economic foundations and application practice to present a reasoned view of the issues that can be considered relevant for such a discussion Considering their effect on the small market problem the author scrutinizes such factors as the following the Commission s methodology for delineating relevant markets in merger assessments unnecessary prohibition caused by overestimation of the market power of small market mergers erroneous approval of cases that should actually be prohibited impact of the so called Harvard and Chicago schools of competition theory and their key policy implications process related alternative views of competition and new synthesizing approaches relevant criteria for a proper analysis of market power concentration measures and market shares barriers to entry price and profitability analyses and product definition v geographic definition of markets In a final chapter the author presents some tentative conclusions normative in nature concerning the problem and the relevant issues relating to it As the first in depth analysis of the issues that are actually involved with its particular diagnosis of the assessment of market power in considering the relevant issues for the problem this study brings into salience the terms of the debate on the problem and thus takes a giant step forward towards defining what needs to be done Competition lawyers policymakers and academics in Europe and elsewhere will find the discussion of great value Law and Economics in European Merger Control Ulrich Schwalbe, Daniel Zimmer, 2009-10 Co written by an expert lawyer and economist this book provides a thorough guide to the economic theory behind the regulation of mergers The economic theory is then used to analyse the current state of European competition law and test the success of the European Commission s search for a more economic approach to merger regulation **Economics and the Enforcement of European Competition Law** Christopher Decker, 2009-01-01 The book is well written and readable by non economists The approaches questions methodology and basis for selection of cases interviewees are clearly explained and justified This book is a valuable contribution to the literature Rhonda Smith Competition and Consumer Law Journal Recent years have seen a trend toward an economics based approach to the enforcement of European competition law But

what is meant by economics based and how does this approach sit with legal and enforcement practice This book seeks to place in perspective the growing use of economics in European competition law enforcement by examining precisely how economics contributes to the enforcement activity of the European Commission and Courts Christopher Decker provides unique empirical insights as to how economic theory thinking techniques and data have featured in decision making in the area of co ordinated effects The role of economics is examined throughout the entire enforcement process from the decision to initiate an investigation to the design and implementation of remedies and its conclusions are of general relevance to all areas of competition law enforcement where economics is used Utilising a broad and multifaceted conception of economics this book is essential reading for academics and students interested in European competition law EC competition lawyers applied industrial economists and enforcement officials It will also be an invaluable tool for academic libraries and institutes government agencies law firms and economic consultancies

New Developments in Competition Law and Economics Klaus Mathis, Avishalom Tor, 2019-03-18 This book further develops both the traditional and the behavioural approach to competition law and applies these approaches to a variety of timely issues It discusses several fundamental questions regarding competition law and economics and explores the applications of competition law and economics In turn the book analyses the interplay of intellectual property rights and patents in various aspects of competition law and investigates the impacts that developments in information technology such as big data analytics have on competition law The book also discusses the impact of energy law reforms on energy markets from a competition law perspective Competition law is a classic field of economic analysis This is largely due to the fact that competition law uses terms such as market price and competition and must therefore rely on economic know how and analyses In the United States economic analysis has greatly influenced not just the scholarship on antitrust law but also judicial decisions and agency enforcement Antitrust law and economics are based on the traditional paradigm of neoclassical economics which relies on the assumption that the market players i e consumers and producers are rational This approach to competition law was later received in Europe under the banner of a more economic approach For the past two decades behavioural law and economics which seeks to generate better insights into legal phenomena by providing more realistic psychological foundations for economic models and to offer a multitude of applications in legislation and legal adjudication has challenged the traditional economic approach to law in general and more recently to competition law specifically

EC Competition and Telecommunications Law Andreas Bartosch, Jens-Daniel Braun, 2009-01-01 This new volume updates the groundbreaking analysis of its first edition in 2002 when the EC common regulatory framework for electronic communications networks and services had just entered into force So much has changed in the intervening years that that this new edition bears little resemblance to its predecessor with every chapter either extensively altered or entirely new It remains however the most detailed and comprehensive overview available of the application of the EC Treaty s competition rules in the markets for telecommunications and audiovisual media

and of the applicable regulatory framework In thirteen chapters each contributed by one or more noted legal authorities in the field the second edition of EC Competition and Telecommunications Law covers the full range of EC telecommunications law across all major areas of both institutional and substantive law both on the international and EC levels including the following State aid the merger control regulation justification for sector specific regulation in EC competition law network access authorizations and privileges and mobile telephony Relevant EC media and communications law and relevant aspects of EC competition law are dealt with in detail While some chapters focus on competition law others deal primarily with sector specific regulation There is practical guidance throughout on procedural matters alongside analysis of the substantive provisions Well known in its first edition this thoroughly revised and updated version continue to be vital reading for practitioners in particular those specializing in European competition law and for company and in house lawyers who are seeking advice on how European law affects their business As a detailed analysis of the basic legislative and regulatory framework of European telecommunications law it will be an invaluable reference work for lawyers judges regulators and policymakers in all the EC Member States as well as for students and teachers of European law **EIB Papers** ,2006

The Governance of Global Competition Oliver Budzinski,2008 Employs the economics of federalism to create an analytical framework which can be used for comparative analysis of stylised competence allocation rules This book offers a perspective on international competition policy It is suitable for economists legal scientists and competition authorities

Policy-making in the European Union Helen S. Wallace,William Wallace,2000 This new edition of the established standard text on policy making in the European Union has been extensively updated and rewritten to take into account all the most important recent developments in EU affairs The new edition is even more comprehensive than its predecessor It now includes 15 case studies of European Union policy making in a range of different fields In addition there are updated introductory chapters on EU institutions and policy processes and a new chapter explaining the various theoretical approaches to the making of policy in the EU Major recent developments examined include the move to a single European currency the expansion of common activities in justice and home affairs recent initiatives to strengthen common foreign and security policy negotiations on eastern enlargement and efforts to reform the Common Agricultural Policy Core policy fields covered include budgetary policy trade competition and the Single Market Case studies of environmental policy social policy and north south relations illustrate the range and diversity of EU policy making Two entirely new case studies examine the common fisheries policy and the struggle to develop a common approach to biotechnology The expert contributors come from six EU member states and from the US Choice ,2005 **Realising Europe's Potential** Great Britain. Treasury,2002 This White Paper sets out the Government s proposals for economic reform of the EU Single Market in the light of the future EU enlargement process and the accession of new member states from central and eastern Europe It reviews the progress made since the Lisbon European Council in 2000 and considers the challenges facing the EU to achieve sustained economic

growth and high living standards The White Paper highlights the need for structural reforms of the product labour and capital markets to improve productivity and employment levels across the EU and provide a strong competitive base in the global economy It identifies the need to reduce unnecessary regulation and trade barriers in order to establish a regulatory system which upholds fair working standards whilst ensuring business can remain competitive and create new jobs It includes proposals to liberalise capital markets establish a single market for financial services the opening up of energy markets across Europe and the creation of EU networks for telecoms transport gas and electricity It also examines the skills and education system required to meet the demands of a knowledge economy and achieve the objectives of social justice social inclusion and sustainable development *Conferences on New Political Economy* ,2007 Current Publications in Legal and Related Fields ,2006 **Mega-Merger Mayhem** Sidney Gray,Michael McDermott,1989-05-28 In Mega Merger Mayhem Sidney Gray and Michael McDermott review the recent merger boom in the United Kingdom from February 1985 to June 1988 highlighting the key events and discussing the major issues They identify the strengths and weaknesses of the Government s merger policy in action and its attitudes towards competition They also examine the conduct of the combatants and their advisors in these battles Finally they assess the policy implications of recent developments both for the UK and the EC and propose various changes Sidney Gray and Michael McDermott describe the drama of the takeover battles the tension the surprise the sudden attack the way first one company gains the advantage and then the other the final triumph of the victor and the humiliation of the vanquished The seven battles are chosen for their interest and reflect important sectors of UK and world business Competition Policy Newsletter ,2004 The Europa World Year Book 2002 Europa Publications,2002 First published in 2002 Routledge is an imprint of Taylor Francis an informa company Merger Control Great Britain. Parliament. House of Lords. Select Committee on the European Communities,1989 *Timber Trades Journal & Wood Processing* ,1986 *The Future of EU Competition Policy* Edward Bannerman,2002 As the chief enforcer of EU competition policy the European Commission can make or break the world s biggest companies Edward Bannerman argues that the Commission should hand over many of its powers to a European Competition Agency to protect anti trust investigations from political pressure New Democrat ,1988
