Making Every Vote Count Reassessing Canadas Election System:

Making Every Vote Count Henry Milner, 1999 Steps Toward Making Every Vote Count brings together the best analyses from the best qualified observers on developments in the growing movement to reform Canada's electoral system. Among mature democracies only the United States and Canada use the first past the post FPTP system for electing all state and provincial as well as national law makers. In Canada the debate over the electoral system which began in earnest after the 1997 federal election is now moving from the university and think tank seminar room to the floor of five provincial legislatures. Four key chapters present up to date accounts of developments in BC, Quebec, PEI and Ontario. They show the provinces moving at different speeds toward meeting an objective to propose a specific model of proportional representation that also ensures a continued role for directly elected representatives of specific geographic boundaries. Two chapters recount experiences in New Zealand and Scotland which adopted electoral plans attempting just such a balance. Others look at South Africa, Japan, France and the United States each selected for the light it casts on a specific aspect of electoral system reform. The remaining chapters consider various practical implications of changing Canada's electoral system now a very real prospect.

The Politics of Electoral Systems Michael Gallagher, Paul Mitchell, 2005-09-15 Electoral systems matter. They are a crucial link in the chain connecting the preferences of citizens to the policy choices made by governments. They are chosen by political actors and once in existence have political consequences for those actors. They are an important object of study for anyone interested in the political process and in this book we subject them to systematic analysis. In addition to some comparative chapters the book contains full accounts of the operation of electoral systems in 22 countries: France, the UK, Germany, Italy, Israel, Spain, Austria, Belgium, Denmark, Finland, The Netherlands, Ireland, Hungary, Russia, Australia, Canada, India, the USA, Japan, New Zealand, Chile and South Africa. The book provides detailed analyses of the operation of a diverse set of electoral systems in their national context. Each chapter explains how the electoral system really works in the given country, examining the strategic incentives the system provides to voters, candidates and parties. All country chapters have a common format and structure. Successive sections analyse the institutional context, how each electoral system was chosen historically, how the current electoral system operates, the rules, mechanics and ballot structure, and the political consequences of the current system, the impact on the party system, the internal life of parties and the impact on parliament and government formation. Each country chapter then contains a final section which focuses on the politicization of electoral institutions. In recent years many countries have changed their electoral systems either entirely or in part so there is a strong focus on the processes of electoral reform both historically and prospectively. The book concentrates on the real world politics as well as the political science of electoral systems. The book will be of interest to those concerned with the practical political business of electoral reform. The book contains a wealth of evidence about the performance of various kinds of proportional representation and of non PR systems. This will be invaluable for anyone
