## **Making Markets An Interdisciplinary Perspective On Economic Exchange:**

**Making Markets** Robin Cantor, Stuart Henry, Steve Rayner, 1992-07-22 This book considers the social and economic arrangements that would be necessary for rational mechanisms of exchange and distribution to emerge function and remain viable if extreme conditions produced an absence or the severe destruction of an institutional infrastructure and of resource endowments Written by an economist a sociologist and an anthropologist the study confronts such radical circumstances from an interdisciplinary perspective thereby rethinking and revising some cherished conventional economic and social assumptions At one level the book discusses the kinds of market structures that would be viable under different socioeconomic conditions At another level the analysis questions monolithic approaches to applied economic analysis and policy based on what works under existing conditions To illustrate the applicability of theoretical modeling the authors consider two policy areas economic recovery from a major societal disaster and economic development The book will be of particular interest to students of applied economics but it will also be of interest to those concerned with social ecology economy and society economic history economic anthropology applied sociology and developmental studies It will be especially valuable to scholars in Eastern European and socialist economic systems that are currently seeking to establish market economies

**The Cultures of Markets** Janelle Knox-Hayes, 2016-06-24 Anthropogenic climate change poses a grave threat to societies around the world The greenhouse gases that generate climate change are produced by virtually every sector of every economy The predominant response of governments around the world is to mitigate climate change through the capping and trading of emissions This book explores the establishment of emissions trading as a form of environmental market based governance in the United States Europe Australia South Korea Japan and China The book conceptualizes markets as institutions and analyzes them as a system of climate governance To this end it argues that international efforts to promulgate markets run up against local cultures of markets that shape economic practices and knowledge to different degrees While the global agenda under the United Nations Framework Convention on Climate Change has sought to develop similar systems to enable interconnected and synchronized emissions reductions each of the cases analyzed here has produced different results The markets and climate policies established reflect the syncretic impact of socio political and cultural context on the institutional transfer of markets Each country expresses a varying degree of ease or unease with the establishment of markets as systems of climate governance Exploration of market adaptation adds new insights to theories of varieties of capitalism The book also examines the material implications of emissions markets on the environment and climatic systems In sum the study finds that cultures of markets present a substantial challenge to a universalist prescription for resolving climate change and highlights issues at the interface of political and economic governance in different political economies This includes issues of citizen state and industry participation and the materiality of economic and financial productivity

**Evolutions of Capitalism** Catherine Casson, Philipp Robinson

Rössner,2022-04-05 This ambitious collection follows the evolution of capitalism from its origins in 13th century European towns to its 16th century expansion into Asia Africa and South America and on to the global capitalism of modern day Written by distinguished historians and social scientists the chapters examine capitalism and its critics and the level of variation and convergence in its operation across locations The authors illuminate the aspects of capitalism that have encouraged but also limited social responsibility and environmental sustainability Covering times places and topics that have often been overlooked in the existing literature this important contribution to the field of economic history charts the most comprehensive chronology of capitalism to date      Designing Public Policies Michael Howlett,2019-01-18 The second edition of this highly regarded book provides a concise and accessible introduction to the principles and elements of policy design in contemporary governance It examines in detail the range of substantive and procedural policy instruments that together comprise the toolbox from which governments choose tools to resolve policy problems and the principles and practices that lead to their use Guiding readers through the study of the many different kinds of instruments used by governments in carrying out their tasks adapting to and altering their environments this book Discusses current trends in instrument use linked to factors such as globalization and the increasingly networked digital and collaborative nature of modern society Considers the principles and practices behind the selection and use of specific types of instruments in contemporary government and the future research agenda of policy design studies and practices Evaluates in detail the merits demerits and rationales for the use of specific organization regulatory financial and information based tools and the trends visible in their use including recent efforts to develop and deploy new tools such as nudges and choice architectures co production and crowd sourcing Addresses the issues surrounding not only individual tools but also concerning the evolution and development of instrument mixes their relationship to policy styles and the challenges involved in their re design Providing a comprehensive overview of this essential component of modern governance and featuring helpful definitions of key concepts and further reading this book is essential reading for all students of public policy administration and management      **Research Handbook on Asian Financial Law** Douglas W. Arner,Wai Yee Wan,Andrew Godwin,Wei Shen,Evan Gibson,2020-01-31 This comprehensive Research Handbook provides an in depth analysis of the different financial law approaches legal systems and trends throughout Asia It considers how reforms following the crises have been critical for the development and growth of the region and explores a broad range of post crisis financial regulatory issues This timely book also examines how inconsistent and divergent approaches to financial market regulation are curtailing the region s potential      **Culture in World Politics** Dominique Jacquin-Berdal,Andrew Oros,Marco Verweij,2016-07-27 World politics can be viewed as the patterns of cooperation and conflict between groups of people with different cultural backgrounds Surprisingly though for several decades the topics of culture in international relations has been largely ignored Only recently an increasing interest has re emerged in how world politics is affected by cultures i e by collectively shared perceptions

norms and beliefs Culture in World Politics contributes to this development by presenting a variety of ways in which the roles of cultures in world politics can be studied A major aim of the book is to highlight alternative ways of thinking about the effects of culture on international relations and to stimulate discussion on the relative merit of these various approaches The book also shows the relevance of cultural studies for understanding two areas often assumed to be free of cultural influences international violence and the international political economy The contributions not only include insightful theoretical discussions but also show how illuminating empirical analyses can be undertaken with the help of cultural theories

Lowering the Cost of Emission Reduction: Joint Implementation in the Framework Convention on Climate Change M.A. Ridley, 2012-12-06 Lowering the Cost of Emission Reduction by Dr Michael Ridley investigates a novel way to reduce the cost of carbon dioxide and sulphur dioxide emission reduction This book asks whether allowing countries to substitute emission reduction undertaken abroad in lieu of emission reduction at home will reduce the cost of emission reduction and allow more rapid and acute falls in pollution Analysing US Department of Energy data on US emission reduction projects undertaken in Eastern Europe and Central America this book explains differences in the cost of emission reduction by method and by country The book sets out the conditions that would allow a joint implementation system to evolve into a full blown tradable permits system Political and practical objections to joint implementation are aired and addressed This book is targeted at the environmental policy community government officials academics the NGO community economists and financiers members of large corporations and museum educators everywhere *Choice*, 1992 **Journal of Economic Literature**, 1996
