Fortress Shield - 2026 Essential Digital Defense for Regular People Alan Palmer, 2025-10-13 Fortress Shield 2026 is a practical field guide for personal cybersecurity and identity protection written for general readers who want to take control of their digital safety. Drawing on three decades of experience in Air Force cyber and command and control operations CMSgt Alan Palmer USAF Ret translates military grade defense principles into simple no cost steps that anyone can follow. This updated 2026 edition provides readers with clear actionable instructions for securing passwords, protecting financial accounts, detecting scams, and building long term online resilience. Each chapter blends real world examples with mission style lessons designed to help civilians apply proven defense strategies to everyday life. Aimed at adults, families, and small business owners, Fortress Shield 2026 Rev 2_3 bridges the gap between technical cybersecurity manuals and consumer self help guides. The book emphasizes readiness, personal responsibility, and digital literacy while showing that strong protection does not require expensive software, only awareness, discipline, and the right tools.

The Economics of Digital Transformation Katarzyna Śledziewska, Renata Włoch, 2021-08-01 The unprecedented Covid 19 crisis revealed the scale and scope of a new type of economy taking shape in front of our very eyes: the digital economy. This book presents a concise theoretical and conceptual framework for a more nuanced analysis of the economic and sociological impacts of the technological disruption that is taking place in the markets of goods and services, labour markets, and the global economy more generally. This interdisciplinary work is a must for researchers and students from economics, business, and other social science majors who seek an overview of the main digital economy concepts and research. Its down to earth approach and communicative style will also speak to businesses practitioners who want to understand the ongoing digital disruption of the market rules and emergence of the new digital business models. The book refers to academic insights from economics and sociology while giving numerous empirical examples drawn from basic and applied research and business. It addresses several burning issues: how are digital processes transforming traditional business models? Does intelligent automation threaten our jobs? Are we reaching the end of globalisation as we know it? How can we best prepare ourselves and our children for the digitally
