CONSTRUCTIVISM AND THE HISTORY OF SCIENCE

JAN GÖSSENS

# Making Natural Knowledge

**Jan Golinski**

## **Making Natural Knowledge:**

**Making Natural Knowledge** Jan Golinski, 2008-07-22 Arguably the best available introduction to constructivism a research paradigm that has dominated the history of science for the past forty years Making Natural Knowledge reflects on the importance of this theory tells the history of its rise to prominence and traces its most important tensions Viewing scientific knowledge as a product of human culture Jan Golinski challenges the traditional trajectory of the history of science as steady and autonomous progress In exploring topics such as the social identity of the scientist the significance of places where science is practiced and the roles played by language instruments and images Making Natural Knowledge sheds new light on the relations between science and other cultural domains A standard introduction to historically minded scholars interested in the constructivist programme In fact it has been called the constructivist s bible in many a conference corridor Matthew Eddy British Journal for the History of Science      *Making Natural Knowledge* Jan Golinski, 1998-05-13 In Making Natural Knowledge Constructivism and the History of Science Jan Golinski reviews recent writing on the history of science and shows how it has been dramatically reshaped by a new understanding of science itself In the last few years scientific knowledge has come to be seen as a product of human culture an approach that has challenged the tradition of the history of science as a story of steady and autonomous progress New topics have emerged in historical research including the identity of the scientist the importance of the laboratory the role of language and instruments and the connections with other realms of culture and society Golinski has written a sympathetic but critical survey of this exciting field of research at a level that can be appreciated by students or anyone else who wants an introduction to contemporary thinking in the development of the sciences      **Making Natural Knowledge** Jan Golinski, 1998 Arguably the best available introduction to constructivism a research paradigm that has dominated the history of science for the past forty years Making Natural Knowledge reflects on the importance of this theory tells the history of its rise to prominence and traces its most important tensions Viewing scientific knowledge as a product of human culture Jan Golinski challenges the traditional trajectory of the history of science as steady and autonomous progress In exploring topics such as the social identity of the scientist the significance of places where science is practiced and the roles played by language instruments and images Making Natural Knowledge sheds new light on the relations between science and other cultural domains A standard introduction to historically minded scholars interested in the constructivist programme In fact it has been called the constructivist s bible in many a conference corridor Matthew Eddy British Journal for the History of Science      *Making Natural Knowledge* Jan Golinski, 1998-05-13 This book reviews recent writing on the history of science and shows how it has been dramatically reshaped by a new understanding of science itself In the last few years scientific knowledge has come to be seen as a product of human culture This new approach has challenged the tradition of the history of science as a story of steady and autonomous progress      **Ping jieJan Golinski, Making natural knowledge: constructivism and the history of science** ,2001      *The Historiography of the*

*Chemical Revolution* John G McEvoy, 2015-10-06 This study offers a critical survey of past and present interpretations of the Chemical Revolution designed to lend clarity and direction to the current ferment of views *The Eclectic Magazine of Foreign Literature, Science, and Art* ,1904

**Science in Democracy** Mark B. Brown, 2009-08-14 An argument that draws on canonical and contemporary thinkers in political theory and science studies from Machiavelli to Latour for insights on bringing scientific expertise into representative democracy Public controversies over issues ranging from global warming to biotechnology have politicized scientific expertise and research Some respond with calls for restoring a golden age of value free science More promising efforts seek to democratize science But what does that mean Can it go beyond the typical focus on public participation How does the politics of science challenge prevailing views of democracy In *Science in Democracy* Mark Brown draws on science and technology studies democratic theory and the history of political thought to show why an adequate response to politicized science depends on rethinking both science and democracy Brown enlists such canonical and contemporary thinkers as Machiavelli Hobbes Rousseau Dewey and Latour to argue that the familiar dichotomy between politics and science reinforces a similar dichotomy between direct democracy and representative government He then develops an alternative perspective based on the mutual shaping of participation and representation in both science and politics Political representation requires scientific expertise and scientific institutions may become sites of political representation Brown illustrates his argument with examples from expert advisory committees bioethics councils and lay forums Different institutional venues he shows mediate different elements of democratic representation If we understand democracy as an institutionally distributed process of collective representation Brown argues it becomes easier to see the politicization of science not as a threat to democracy but as an opportunity for it *The Imperial Dictionary and Encyclopedia of Knowledge Unabridged* Charles Annandale, 1892 *The Works of Oliver Goldsmith: Prefaces and introductions. Animated nature (extracts) Nobleman's letters. Goody Two-shoes. Index* Oliver Goldsmith, 1886 *The Making of Our Middle Schools* Elmer Ellsworth Brown, 1903
