Cultural Conflicts in the Nuclear Age Laura E. Hein, Mark Selden, 2015-02-18 The development and use of the atomic bombs at Hiroshima and Nagasaki number among the formative national experiences for both Japanese and Americans as well as for 20th century Japan US relations This volume explores the way in which the bomb has shaped the self image of both peoples **The Making of the Atomic Bomb** Richard Rhodes, 1986 Here for the first time in rich human political and scientific detail is the complete story of how the bomb was developed from the turn of the century discovery of the vast energy locked inside the atom to the dropping of the first bombs on Japan Few great discoveries have evolved so swiftly or have been so misunderstood From the theoretical discussions of nuclear energy to the bright glare of Trinity there was a span of hardly more than twenty five years What began as merely an interesting speculative problem in physics grew into the Manhattan Project and then into the Bomb with frightening rapidity while scientists known only to their peers Szilard Teller Oppenheimer Bohr Meitner Fermi Lawrence and von Neumann stepped from their ivory towers into the limelight Richard Rhodes takes us on that journey step by step minute by minute and gives us the definitive story of man s most awesome discovery and invention The Making of the Atomic Bomb has been compared in its sweep and importance to William L Shirer s The Rise and Fall of the Third Reich It is at once a narrative tour de force and a document as powerful as its subject

Secret Weapons and World War II Walter E. Grunden, 2005 Grunden s analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan s failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East **BOOK JACKET** **American Airpower Strategy in Korea, 1950-1953** Conrad C. Crane, 2000 The Korean War was the first armed engagement for the newly formed U S Air Force but far from the type of conflict it expected or wanted to fight As the first air war of the nuclear age it posed a major challenge to the service to define and successfully carry out its mission by stretching the constraints of limited war while avoiding the excesses of total war Conrad Crane analyzes both the successes and failures of the air force in Korea offering a balanced treatment of how the air war in Korea actually unfolded He examines the Air Force s contention that it could play a decisive role in a non nuclear regional war but shows that the fledgling service was held to unrealistically high expectations based on airpower s performance in World War II despite being constrained by the limited nature of the Korean

conflict Crane exposes the tensions and rivalries between services showing that emphasis on strategic bombing came at the expense of air support for ground troops and he tells how interactions between army and air force generals shaped the air force's mission and strategy He also addresses misunderstandings about plans to use nuclear biological and chemical weapons in the war and includes new information from pilot correspondence about the informal policy of hot pursuit over the Yalu that existed at the end of the war The book considers not only the actual air effort in Korea but also its ramifications The air force doubled in size during the war and used that growth to secure its position in the defense establishment but it wagered its future on its ability to deliver nuclear weapons in a high intensity conflict a position that left it unprepared to fight the next limited war in Vietnam As America observes the fiftieth anniversary of its initial engagement in Korea Crane's book is an important reminder of the lessons learned there And as airpower continues to be a cornerstone of American defense this examination of its uses in Korea provides new insights about the air force's capabilities and limitations

The Living Church, 1946 **Bernard Brodie and the Foundations of American Nuclear Strategy** Barry Howard Steiner, 1991 Steiner analyzes how and why Brodie's understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets He shows the tremendous effect Brodie's work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom

Congressional Record United States. Congress, 1945 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789-1824 the Register of Debates in Congress 1824-1837 and the Congressional Globe 1833-1873

Central Headlight, 1949-10 The Making of the Atom Bomb Victoria Sherrow, 2000 Discusses various topics connected to the production of the atom bomb including the development of nuclear energy work on atomic weapons at the Los Alamos and other sites and the decision to use the first atomic bomb during World War II
