## **Making Environmental Policy:**

*Making Environmental Policy* Daniel J. Fiorino, 2023-04-28 Who speaks for the trees the water the soil and the air in American government today Which agencies confront environmental problems and how do they set priorities How are the opposing claims of interest groups evaluated Why do certain issues capture the public's attention In *Making Environmental Policy* Daniel Fiorino combines the hands-on experience of an insider with the analytic rigor of a scholar to provide the fullest most readable introduction to federal environmental policymaking yet published A committed environmental advocate he takes readers from theory to practice demonstrating how laws and institutions address environmental needs and balance them against other political pressures Drawing on the academic literature and his own familiarity with current trends and controversies Fiorino offers a lucid view of the institutional and analytic aspects of environmental policymaking A chapter on analytic methods describes policymakers' attempts to apply objective standards to complex environmental decisions The book also examines how the law the courts political tensions and international environmental agencies have shaped environmental issues Fiorino grounds his discussion with references to numerous specific cases including radon global warming lead and hazardous wastes Timely and necessary this is an invaluable handbook for students activists and anyone wanting to unravel contemporary American environmental politics Who speaks for the trees the water the soil and the air in American government today Which agencies confront environmental problems and how do they set priorities How are the opposing claims of interest groups evaluated Why do certain issues capture

*Environmental Policy and Politics* Michael E. Kraft, 2001 This up-to-date and readable text is a concise yet thorough examination of environmental natural resource and energy policy and politics primarily within the United States Drawing from work within environmental science policy analysis and political science it critically examines the key strengths and weaknesses of policy making processes today as well as the promise of new policy approaches It offers extensive coverage of the nature of environmental problems and historical developments in environmental policy The overriding theme of *Environmental Policy and Politics* Second Edition is that democratic approaches to policy making and policy change are likely to be the most effective over time based on strong public support In that vein the book stresses the opportunities available to citizens to shape environmental policies at all levels of government

*Environmental Policy: New Directions for the Twenty-First Century 8th Edition* Norman J. Vig, Michael E. Kraft, 2012-05-15 Available this summer in its Eighth Edition Rosenbaum's classic comprehensive text once more provides definitive coverage of environmental politics and policy lively case material and a balanced assessment of current environmental issues Notable revisions include A completely revamped energy chapter covering conventional energy policy as well as a comparative examination of alternatives to current energy production Expanded discussion of current U.S. climate change policy with attention to the role of the states the impact of global environmental politics and emerging technologies on policy alternatives Analysis of the Obama administration's energy agenda and its profound differences from

Bush administration policies and the practical difficulties of creating an effective political coalition in support of the new policy agenda Greater emphasis on executive congressional relations in the policy making cycle Examination of changes in the environmental movement with particular attention to newly emerging cleavages over energy and climate issues A thorough updating of all policy chapters including an examination of such topics as mountain top removal the emergence of Bisphenol A as an endocrine disruptor issue and the new NIMBYism New and revised tables figures and other data illustrate key environmental information while a new detailed timeline frames the initial chapter s historical narrative of evolving environmental policy

Making Environmental Policy Daniel J. Fiorino, 2023-04-28 Who speaks for the trees the water the soil and the air in American government today Which agencies confront environmental problems and how do they set priorities How are the opposing claims of interest groups evaluated Why do certain issues capture the public s attention In Making Environmental Policy Daniel Fiorino combines the hands on experience of an insider with the analytic rigor of a scholar to provide the fullest most readable introduction to federal environmental policymaking yet published A committed environmental advocate he takes readers from theory to practice demonstrating how laws and institutions address environmental needs and balance them against other political pressures Drawing on the academic literature and his own familiarity with current trends and controversies Fiorino offers a lucid view of the institutional and analytic aspects of environmental policymaking A chapter on analytic methods describes policymakers attempts to apply objective standards to complex environmental decisions The book also examines how the law the courts political tensions and international environmental agencies have shaped environmental issues Fiorino grounds his discussion with references to numerous specific cases including radon global warming lead and hazardous wastes Timely and necessary this is an invaluable handbook for students activists and anyone wanting to unravel contemporary American environmental politics Who speaks for the trees the water the soil and the air in American government today Which agencies confront environmental problems and how do they set priorities How are the opposing claims of interest groups evaluated Why do certain issues captur

Environmental Politics Norman Miller, 2017-12-19 At every stage environmental policy is the result of the combat of stakeholders interested in and affected by the problem being addressed and the range of possible solutions The combatants include any or all of the following the federal government environmental advocacy groups and business the media the scientific community think tanks NGOs of every stripe trade associations and professional organizations and even state and local governments each of whom have their own interests in the resulting policy Environmental Politics Interest Groups the Media and the Making of Policy discusses political battles over the environment from ground level as they are fought in legislative chambers the daily newspaper on television and increasingly on the Internet The text explores environmental politics as a clash of interests not ideologies and environmental policy as a result of the reconciliation of those interests The author covers not only the conventional aspects of the policymaking process but more recent and less recognized elements

and developments such as Proliferation of legislative riders and monument designations as major environmental strategies  
Evolving role of the media from science popularizer to agenda setter Growing influence on both Congress and the public of  
conservative and libertarian foundations and think tanks Devolution of environmental power from the Federal to state  
governments Metamorphosis of EPA in a business driven regulatory revolution Effect of globalization on US environmental  
policy Newly emerging role of the precautionary principle in marrying science and politics Increasing role of the Internet in  
promoting populist issues and promoting the decentralization of the environmental power structure No other book covers the  
politics of the environment the way this one does Written by an expert with 25 years of experience in environmental  
policymaking **Environmental Politics Interest Groups the Media and the Making of Policy** gives you an insider's view of how  
policies are forged By examining these issues through an interest group lens this book not only accounts for what policies  
have been adopted but also shows how you can influence policy and effect change      **Environmental Policy in Transition**  
Ken Sexton, Barbara Scott Murdock, 1996      *Decision Making for the Environment* National Research Council, Division of  
Behavioral and Social Sciences and Education, Center for Economic, Governance, and International Studies, Committee on the  
Human Dimensions of Global Change, Panel on Social and Behavioral Science Research Priorities for Environmental Decision  
Making, 2005-07-01 With the growing number complexity and importance of environmental problems come demands to  
include a full range of intellectual disciplines and scholarly traditions to help define and eventually manage such problems  
more effectively *Decision Making for the Environment* Social and Behavioral Science Research Priorities is the result of a 2  
year effort by 12 social and behavioral scientists scholars and practitioners The report sets research priorities for the social  
and behavioral sciences as they relate to several different kinds of environmental problems      **Nature and the City** Gene  
Desfor, Roger Keil, 2022-09-20 Pollution of air soil and waterways has become a primary concern of urban environmental  
policy making and over the past two decades there has emerged a new era of urban policy that links development with  
ecological issues based on the notion that both nature and the economy can be enhanced through technological changes to  
production and consumption systems This book takes a new look at this application of ecological modernization to  
contemporary urban political ecological struggles Considering policy processes around land use in urban watersheds and  
pollution of air and soil in two disparate North American global cities it criticizes the dominant belief in the power of markets  
and experts to regulate environments to everyone's benefit arguing instead that civil political action by local constituencies  
can influence the establishment of beneficial policies The book emphasizes subaltern environmental justice concerns as  
instrumental in shaping the policy process Looking back to the 1990s when ecological modernization began to emerge as a  
dominant approach to environmental policy and theory Desfor and Keil examine four case studies restoration of the Don  
River in Toronto cleanup of contaminated soil in Toronto regeneration of the Los Angeles River and air pollution reduction in  
Los Angeles In each case they show that local constituencies can develop political strategies that create alternatives to

ecological modernization When environmental policies appear to have been produced through solely technical exercises they warn one must be suspicious about the removal of contention from the process In the face of economic and environmental processes that have been increasingly influenced by neo liberalism and globalization Desfor and Keil s analysis posits that continuing modernization of industrial capitalist societies entails a measure of deliberate change to societal relationships with nature in cities Their book shows that environmental policies are about much more than green capitalism or the technical mastery of problems they are about how future urban generations live their lives with sustainability and justice

*Environmental Policy Analysis for Decision Making* J. Loomis, Gloria Helfand, 2006-01-09 1 ENVIRONMENTAL POLICY ANALYSIS WHAT AND WHY Why environmental policy analysis Environmental issues are growing in visibility in local national and world arenas as a myriad of human activities leads to increased impacts on the natural world Issues such as climate change endangered species wilderness protection and energy use are regularly on the front pages of newspapers Governments at all levels are struggling with how to address these issues Environmental policy analysis is intended to present the environmental and social impacts of policies in the hope that better decisions will result when people have better information on which to base those decisions Conducting environmental policy analysis requires people who understand what it is and how to do it Interpreting it also requires those skills We hope that this book will increase the abilities both of analysts and of decision makers to understand and interpret the impacts of environmental policies Policy analysis books almost invariably begin by pointing out that policy analysis can take many forms This book is no different As you will see in Chapter 1 we consider policy analysis to be information provided for the policy process That information can take many forms from sophisticated empirical analysis to general theoretical results from summary statistics to game theoretic strategies

*Making Environmental Law* Nancy E. Marion, 2011-08-10 From Eisenhower to Obama this book provides a comprehensive analysis of the policies Congress and the president have proposed and passed to protect the environment over time The U S federal government first began to consider legislation to protect the environment and natural resources in 1940s Since that time Congress and the president have considered and passed numerous environmental policies laws that serve to protect the quality of the air we breathe the water we drink the natural beauty of the land and the animals that live both on land and in the water In *Making Environmental Law The Politics of Protecting the Earth* experienced and accomplished environmental law researcher Nancy E Marion shows what policies Congress have proposed and passed to protect the environment over time Each chapter focuses on the members of Congress s response to a different environmental concern such as ocean dumping pesticides and solid waste With green awareness now affecting every aspect of our modern world this text serves as an invaluable reference for students and researchers who need a deeper historical background on the political aspects of these issues

***Making Environmental Policy*** Irwin M. Stelzer, Paul R. Portney, 1998 Two prominent economists comment on the bitter divisive and passionate debate on the proper direction of environmental policy

**Making Environmental Laws Work** William Wilson,1999-01-19 The book considers the political context in which environmental laws are made and the implications for long term public support of them *Environmental politics in the European Union* Christoph Knill,Duncan Liefferink,2013-07-19 This book provides a comprehensive introduction to the development making and implementation of European Union environmental politics and identifies the central areas and instruments of EU environmental policy It analyses the factors influencing not only the formulation but also the implementation of environmental measures in the complex multi level setting of the EU On this basis it takes a critical look at the EU s effectiveness and problem solving capacity in the environmental field Designed as a textbook at undergraduate and graduate level the book employs a clear and insightful analytical perspective based on the theoretical state of the art of EU policy studies Thus it provides an overview of the major theoretical approaches available in the field At the same time the discussion is illustrated by a broad range of empirical findings with regard to the formulation and implementation of EU environmental policy This study is an ideal companion for anyone seeking a concise and accessible introduction into EU environmental politics Environmental Politics and Policy James P. Lester,1989 **The Role of Science in Environmental Policy Making** United States Senate,Committee on Environment and P. (senate),United States. Congress,2019-10-08 The role of science in environmental policy making hearing before the Committee on Environment and Public Works United States Senate One Hundred Ninth Congress first session September 28 2005 *Environmental Policy Making in Economies with Prior Tax Distortions* Lawrence Herbert Goulder,2002 In evaluating environmental policy researchers have tended to focus on the industry or market that is targeted by regulation and to disregard policy impacts in other parts of the economy Recent research indicates however that in economies where governments rely on distortionary taxes environmental regulation can profoundly affect costs and efficiency in areas other than the targeted industry or market These findings signal the importance of evaluating environmental policy using a general equilibrium framework an approach that can capture interactions across industries sectors or markets General equilibrium analysis can fundamentally alter the evaluation of environmental tax policies and can overturn conventional wisdom concerning the relative cost effectiveness of environmental taxes emissions quotas or mandated technologies This volume gathers together important papers on the general equilibrium impacts of environmental regulation in the presence of distortionary taxes Topics include optimal environmental taxation green tax reform and the double dividend and the choice among alternative policy instruments The volume will be of interest to environmental economists public finance economists and researchers interested in the economics of regulation **The Role of Science in Environmental Policy Making** United States. Congress,United States Senate,Committee on Environment and Public Works,2018-01-22 The role of science in environmental policy making hearing before the Committee on Environment and Public Works United States Senate One Hundred Ninth Congress first session September 28 2005 **Making Reform Happen Lessons from OECD Countries** OECD,2010-05-26 This collection of

essays analyses the reform experiences of the 30 OECD countries in nine major policy domains in order to identify lessons pitfalls and strategies that may help foster policy reform in the future

**The Making of Environmental Law** Richard J. Lazarus, 2023-02-15 An updated and passionate second edition of a foundational book How did environmental law first emerge in the United States Why has it evolved in the ways that it has And what are the unique challenges inherent to environmental lawmaking in general and in the United States in particular Since its first edition The Making of Environmental Law has been foundational to our understanding of these questions For the second edition Richard J Lazarus returns to his landmark book and takes stock of developments over the last two decades Drawing on many years of experience on the frontlines of legal and policy battles Lazarus provides a theoretical overview of the challenges that environmental protection poses for lawmaking related to both the distinctive features of US lawmaking institutions and the spatial and temporal dimensions of ecological change The book explains why environmental law emerged in the manner and form that it did in the 1970s and traces how it developed over sequent decades through key laws and controversies New chapters composing more than half of the second edition examine a host of recent developments These include how Congress dropped out of environmental lawmaking in the early twenty first century the shifting role of the judiciary long overdue efforts to provide environmental justice to disadvantaged communities and the destabilization of environmental law that has resulted from the election of Presidents with dramatically clashing environmental policies As the nation s partisan divide has grown deeper and the challenge of climate change has dramatically raised the perceived stakes for opposing interests environmental law is facing its greatest challenges yet This book is essential reading for understanding where we have been and what challenges and opportunities lie ahead

**Controversial Issues In Environmental Policy** Kent E. Portney, 1992-09-03 Most controversies in environmental policy are rooted in clashes of values involving science and technology versus humanism economic efficiency versus humanism the role of nature in society and the role of government in society The author discusses how America makes environmental policy at the Federal and State levels as well as their enforcement agencies designed to protect and regulate at the same time Portney examines legislation public opinion implementation or non implementation relative to the debates over water air and soil management
