Making Hard Decisions With Decisiontools Suite:

Making Hard Decisions with DecisionTools Robert Taylor Clemen, Terence Reilly, 2001 **MAKING HARD DECISIONS WITH DECISIONTOOLS** is a special version of Bob Clemen's best selling text **MAKING HARD DECISIONS**. This straight forward book teaches the fundamental ideas of decision analysis without an overly technical explanation of the mathematics used in management science. This new version incorporates and implements the powerful DecisionTools by Palisade Corporation, the world's leading toolkit for risk and decision analysis. At the end of each chapter topics are illustrated with step by step instructions for DecisionTools. This new version makes the text more useful and relevant to students to business and engineering.

Value-Added Decision Making for Managers Kenneth Chelst, Yavuz Burak Canbolat, 2011-10-05
Developed from the authors longstanding course on decision and risk analysis, **Value Added Decision Making for Managers** explores the important interaction between decisions and management action and clarifies the barriers to rational decision making. The authors analyze strengths and weaknesses of the best alternatives enabling decision makers to improve on these alternatives by adding value and reducing risk. The core of the text addresses decisions that involve selecting the best alternative from diverse choices. The decisions include buying a car, picking a supplier or home contractor, selecting a technology, picking a location for a manufacturing plant or sports stadium, hiring an employee or selecting among job offers, deciding on the size of a sales force, making a late design change, and sourcing to emerging markets. The book also covers more complex decisions arising in negotiations, strategy and ethics that involve multiple dimensions simultaneously. Numerous activities interspersed throughout the text highlight real world situations helping readers see how the concepts presented can be used in their own work environment or personal life. Each chapter also includes discussion questions and references. Web Resource: The book's website at <http://ise.wayne.edu/research/decision.php> offers tutorials of Logical Decisions software for multi objective decisions and Precision Tree software for probabilistic decisions. Directions for downloading student versions of the DecisionTools Suite and Logical Decisions software can be found in the appendices. Password protected PowerPoint presentations for each chapter and solutions to all of the numeric examples are available for instructors.
