Use of Earth Observations for Actionable Decision Making in the Developing World Niall Patrick Hanan, Ashutosh S. Limaye, Daniel Eric Irwin, 2021-01-13 **The Making of the Earth** John Walter Gregory, 1935 *Novel AI Applications for Advancing Earth Sciences* Yadav, Sudesh, Yadav, Satya Prakash, Raj, Pethuru, Tiwari, Prabhakar, Albuquerque, Victor Hugo C. de, 2023-12-29 The Earth Sciences industry faces a new challenge: the need for accurate, efficient, and reliable methods to monitor and predict geological phenomena and environmental changes. As climate change, earthquakes, and other natural disasters become more frequent and severe, the necessity for advanced tools and techniques is paramount. Traditional methods often fall short in providing the precision and speed required to address these critical issues. Geologists and earth scientists who are grappling with the urgent problem of utilizing artificial intelligence (AI) to revolutionize their field will find the solution within the pages of *Novel AI Applications for Advancing Earth Sciences*. This book offers the research community concepts expanding upon the fusion of AI technology with earth sciences. By leveraging advanced AI tools such as convolutional neural networks, support vector machines, artificial neural networks, and the potential of remote sensing satellites, this book transforms the identification of geological features, geological mapping, soil classification, and gas detection. Scientists can now predict earthquakes and assess the probability of climate change with unprecedented accuracy. Additionally, the book explains how the optimization of algorithms for specific tasks substantially reduces the time complexity of earth observations, leading to an unprecedented leap in accuracy and efficiency. **Making of the Earth** James Walter Gregory, 1912 **The Making of the Earth (Classic Reprint)** J.
