Making Of The Slavs:

The Making of the Slavs Florin Curta, 2001-07-12 This book offers an alternative approach to the problem of Slavic ethnicity in south eastern Europe between c 500 and c 700 from the perspective of current anthropological theories The conceptual emphasis here is on the relation between material culture and ethnicity The author demonstrates that the history of the Sclavenes and the Antes begins only at around 500 AD He also points to the significance of the archaeological evidence which suggests that specific artefacts may have been used as identity markers This evidence also indicates the role of local leaders in building group boundaries and in leading successful raids across the Danube Because of these military and political developments Byzantine authors began employing names such as Sclavines and Antes in order to make sense of the process of group identification that was taking place north of the Danube frontier Slavic ethnicity is therefore shown to be a Byzantine invention

Slavs in the Making Florin Curta, 2020-09-28 Slavs in the Making takes a fresh look at archaeological evidence from parts of Slavic speaking Europe north of the Lower Danube including the present day territories of the Czech Republic Slovakia Poland Belarus Ukraine and Russia Nothing is known about what the inhabitants of those remote lands called themselves during the sixth century or whether they spoke a Slavic language The book engages critically with the archaeological evidence from these regions and questions its association with the Slavs that has often been taken for granted It also deals with the linguistic evidence primarily names of rivers and other bodies of water that has been used to identify the primordial homeland of the Slavs and from which their migration towards the Lower Danube is believed to have started It is precisely in this area that sociolinguistics can offer a serious alternative to the language tree model currently favoured in linguistic paleontology The question of how best to explain the spread of Slavic remains a controversial issue This book attempts to provide an answer and not just a critique of the method of linguistic paleontology upon which the theory of the Slavic migration and homeland relies The book proposes a model of interpretation that builds upon the idea that Common Slavic cannot possibly be the result of Slavic migration It addresses the question of migration in the archaeology of early medieval Eastern Europe and makes a strong case for a more nuanced interpretation of the archaeological evidence of mobility It will appeal to scholars and students interested in medieval history migration and the history of Eastern and Central Europe

Slavs in the Making Florin Curta, 2020-09-29 Slavs in the Making takes a fresh look at archaeological evidence from parts of Slavic speaking Europe north of the Lower Danube including the present day territories of the Czech Republic Slovakia Poland Belarus Ukraine and Russia Nothing is known about what the inhabitants of those remote lands called themselves during the sixth century or whether they spoke a Slavic language The book engages critically with the archaeological evidence from these regions and questions its association with the Slavs that has often been taken for granted It also deals with the linguistic evidence primarily names of rivers and other bodies of water that has been

used to identify the primordial homeland of the Slavs and from which their migration towards the Lower Danube is believed to have started. It is precisely in that area that sociolinguistics can offer a serious alternative to the language tree model currently favored in linguistic paleontology. The question of how best to explain the spread of Slavic remains a controversial issue. This book attempts to provide an answer and not just a critique of the method of linguistic paleontology upon which the theory of the Slavic migration and homeland relies. The book proposes a model of interpretation that builds upon the idea that Common Slavic cannot possibly be the result of Slavic migration. It addresses the question of migration in the archaeology of early medieval Eastern Europe and makes a strong case for a more nuanced interpretation of the archaeological evidence of mobility. It will appeal to scholars and students interested in medieval history, migration and the history of Eastern and Central Europe.

The Making of the Slavs Florin Curta, 2007-04-30 This book offers a new approach to the problem of Slavic ethnicity in southeastern Europe between c 500 and c 700. The author shows how Byzantine authors invented the Slavs in order to make sense of political and military developments taking place in the Balkans. Making extensive use of archaeology to show that such developments resulted in the rise of powerful leaders responsible for creating group identities and mobilizing warriors for successful raids across the frontier. The author rejects the idea of Slavic migration and shows that the Slavs were the product of the frontier.

The Avars Walter Pohl, 2018-12-15 Though the book was first published in German in 1988, this English version includes many revisions and updates and will be the definitive English language study of the Avar empire for years to come. It will be invaluable for those interested in medieval history or in the impact of nomadic steppe empires on sedentary civilizations. Choice The Avars arrived in Europe from the Central Asian steppes in the mid sixth century CE and dominated much of Central and Eastern Europe for almost 250 years. Fierce warriors and canny power brokers, the Avars were more influential and durable than Attila's Huns yet have remained hidden in history. Walter Pohl's epic narrative translated into English for the first time restores them to their rightful place in the story of early medieval Europe. The Avars offers a comprehensive overview of their history, tracing the Avars from the construction of their steppe empire in the center of Europe, their wars and alliances with the Byzantines, Slavs, Lombards and others, their apex as the first so-called barbarian power to besiege Constantinople in 626, to their fall under the Frankish armies of Charlemagne and subsequent disappearance as a distinct cultural group. Pohl uncovers the secrets of their society, synthesizing the rich archaeological record recovered from more than 60,000 graves of the period as well as accounts of the Avars by Byzantine and other chroniclers. In recovering the story of the fascinating encounter between Eurasian nomads who established an empire in the heart of Europe and the post-Roman Christian cultures of Europe, this book provides a new perspective on the origins of medieval Europe itself.
