Social Trauma, Narrative Memory, and Recovery in Japanese Literature and Film David Stahl,2019-07-02

This book provides a comprehensive analysis of major works in Japanese literature and film through the interpretive lens of trauma and PTSD studies. Focusing critical attention on the psychodynamics and enduring psychosocial aftereffects of social trauma, it also evaluates the themes of dissociation, failed mourning, and psychological defence fantasies. Building on earlier studies, this book emphasizes the role of protagonists in managing to effect partial recovery by composing memoirs in which they transform dissociated traumatic memory into articulate narrative memory or bring about advanced recovery by pioneering alternative means of orally communicating working through and overcoming debilitating personal histories of traumatization and victimization. In so doing, Stahl also demonstrates that what holds true on the individual and microcosmic level also does so on the collective and macrocosmic level. This new critical approach sheds important new light on canonical Japanese novels and films and enables recognition and appreciation of integral psychosocial aspects of these traumatic narratives. As such, the book will be of huge interest to students and scholars of Japanese film and literature as well as those of trauma studies.

Re-Authoring Life Narratives After Trauma: A Holistic Narrative Model of Care Charles B.

Manda,2019-12-12 Re authoring Life Narratives after Trauma is an interdisciplinary specialist resource for traumatic stress researchers, practitioners and frontline workers who focus their research and work on communities from diverse religious backgrounds that are confronted with trauma, death, illness and other existential crises. This book aims to argue that the biopsychosocial approach is limited in scope when it comes to reaching a holistic model of assessing and treating individuals and communities that are exposed to trauma. The holistic model must integrate an understanding of and respect for the many forms of religion and spirituality that clients might have (Pargament 2011). It will not only bring a spiritual perspective into the psychotherapeutic dialogue but it will also assist in dealing with the different demands in pastoral ministry as related to clinical and post-traumatic settings. The book makes several contributions to scholarship in the disciplines of although not limited to traumatic stress studies, pastoral care and counselling psychology and psychiatry. Firstly, the book brings spirituality into the psychotherapeutic dialogue. Traditionally, religious and spiritual topics have not been a welcome part of the psychotherapeutic dialogue. Secondly, it underscores the significance of documenting literary narratives as a means of healing trauma. Writing about our traumas enables us to express things that cannot be conveyed in words and to bring to light what has been suppressed and imagine new possibilities of living meaningfully in a changed world. Thirdly, it proposes an extension to the five stage model of trauma and recovery coined by Judith Herman.
