*Building CISCO Networks for Windows 2000* Syngress, 2000-10-17. Microsoft Corporation, the world's largest software vendor, and Cisco Systems, the world's largest internetworking vendor, have jointly developed a common software interface for managing Cisco hardware on Microsoft networks, Cisco Network Services for Active Directory (CNS AD). Until now, network administrators have been forced to master two completely different product interfaces to effectively manage their networks. *Configuring Cisco Network Services for Active Directory* is the first book announced for this enormous Information Technology audience. This book is a practical guide to managing CNS AD. It focuses on how to promote system efficiency and improve network service by using CNS AD to centralize network management using the directory as a repository for all

policies that govern network usage The book also describes how to manage Cisco Internetworking Operating System IOS networking features and network resources in the same unified way as other enterprise resources such as user access controls files and printers This book coincides with the launch of Windows 2000 Server the host system for the product This new technology promises to reduce administrative overheads Over 500 000 Microsoft and Cisco certification guides from Syngress have been sold over the last two years Cisco is red hot and this is the merging of its technologies with Microsoft
