scaffolding for and a reminder of something that's already inside us. It is a discovery but also an invention, a return to home. Rivers, mountains, oceans, ancient ruins, or small towns: these places inhabit our minds and our dreams and like psychic objects they are embedded in our memory and our unconscious. This book will appeal to psychoanalysts and therapists of all kinds and to any reader who wants to understand the deep links between ourselves and our landscape in therapy and in everyday life.

*Who's who in Australia*, 2007      **The Encyclopedia of Codenames of World War II (Routledge Revivals)** Christopher Chant, 2013-10-18. Codenames were a vital feature of World War II, serving as mental shorthand for those in the know and obscuring the issues for those who were not. Codenames were used from the highest level in the planning of grand strategic moves affecting the conduct of the whole war to the lowest command divisions in the conduct of small-scale tactical operations. This encyclopedia, first published in 1986, removes the mystery surrounding many of the important code names from the era. With around 3,000 entries drawn from all sides: the U.K., U.S.A., Germany, the U.S.S.R. and Japan, Christopher Chant's work provides a uniquely comprehensive and full overview of major operations, names and code words. Thorough and exciting, this key reference reissue is an exceptionally valuable resource for military historians, enthusiasts and general readers with an interest in World War II.
