curriculum drawing on the different experiences of curriculum reforms in different states They take up the problems of framing vocational and academic education for the new century and of confronting equity and diversity issues They show the fundamental differences that exist in Australia regarding the impact of examinations and assessment and the very different policy approaches that have been taken to tackle these issues Many people in this country are unaware of how much their experience of education has been formed by the particular values of the state in which they were educated For the first time this book demonstrates the effects of those differences now and into the future **The New Basics** Michel
