**Streaming Music** Sofia Johansson, Ann Werner, Patrik Åker, Greg Goldenzwaig, 2017-08-24

Streaming Music examines how the Internet has become integrated in contemporary music use by focusing on streaming as a practice and a technology for music consumption The backdrop to this enquiry is the digitization of society and culture where the music industry has undergone profound disruptions and where music streaming has altered listening modes and meanings of music in everyday life The objective of Streaming Music is to shed light on what these transformations mean for listeners by looking at their adaptation in specific cultural contexts but also by considering how online music platforms and streaming services guide music listeners in specific ways Drawing on case studies from Moscow and Stockholm and providing analysis of Spotify VK and YouTube as popular but distinct sites for music Streaming Music discusses through a qualitative cross cultural study questions around music and value music sharing modes of engaging with music and the way that contemporary music listening is increasingly part of mobile automated and computational processes Offering a nuanced

perspective on these issues it adds to research about music and digital media shedding new light on music cultures as they appear today As such this volume will appeal to scholars of media sociology and music with interests in digital technologies

An Analysis of Spotify Jacob Papageorgiou, 2016-12-08 Bachelor Thesis from the year 2016 in the subject Business economics Business Management Corporate Governance grade 1.0 Kingston University London Music course BA Music language English abstract The recording industry is undergoing an economic decline The new generation needs a business model which supplements the demands of the digital age This dissertation investigates the consumption of digital music Rapid development in the digital music market has been led by the growth of online streaming services such as Spotify Consumers now have the choice to obtain songs from a selection of paid and non paid legal sources A perspective concerning digital natives is seen through the theory of access replacing ownership Consumer group analysis of demands shows that ownership seems to be outdated Spotify acts as an example to the theory of access Access and ownership is further examined in this dissertation These ideas are analysed alongside the economic impact of consumer behaviour in the music industry Chicago Top 40 Charts 1960-1969 Ron Smith, 2001-08-01 We Americans love to rank things Whether it's the top television programs or movies at the

box office we have a burning desire to know when something is number one Music is no exception Music charts have been around as long as recorded music and radio programs from Your Hit Parade to American Top 40 have capitalized on the idea of counting down the day's top hits It is said that the first printed radio survey of the current top tunes was the WIND Top 21 in Chicago Whether that's true is irrelevant Because of it Chicagoans got into the habit of picking up a list of the latest hits at their local record stores When ABC bought WLS The Prairie Farmer Station in 1960 and switched it to the fledgling top 40 format it soon followed with the Silver Dollar Survey of Chicago's top 40 tunes For over 30 years WLS and its FM successor WYTZ kept the surveys going each week And with its 50 000 watt clear channel signal and enormous respect in the industry to be listed on WLS survey was perhaps more of an honor than to appear on the national Billboard Hot 100 Chicago Top 40 Charts 1960-1969 documents those songs that dominated the Midwestern airwaves during that decade considered by many to be top 40's golden age Many of the songs listed did not appear at all on the national charts Others including local acts fared much better in Chicago than in the rest of the country Chicago Top 40 Charts 1960-1969 contains an alphabetical listing by title and by artist of every tune listed on the WLS Silver Dollar Surveys during those years It also lists the top 40 songs of each year and for the entire decade as well as a supplemental listing of songs on the station's Rhythm and Blues chart of 1964 For those who grew up listening to radio in the Windy City as well as for record collectors from anywhere Chicago Top 40 Charts 1960-1969 will be a valued addition to any music reference library

**Platforms, Promotion, and Product Discovery** Luis Aguiar (Research fellow), Joel Waldfogel, 2018 Digitization has vastly increased the amount of new music produced and available directly to consumers While this has levelled the playing field between already prominent and new artists creators may now be dependent on platform decisions about which songs and artist to promote With Spotify emerging as a major interactive streaming platform this paper explores the effect of Spotify's playlists on both the promotion of songs and the discovery of music by new artists using four approaches First we examine songs streaming volumes before and after their addition to and removal from major global playlists Second we compare streaming volumes for songs just on and just off algorithmic top 50 playlists Third we make use of cross country differences in inclusion on New Music Friday lists using song fixed effects to explain differences in streaming Fourth we develop an instrumental variables approach to explaining cross country New Music Friday rank differentials based on home bias Being added to Today's Top Hits a list with 18.5 million followers during the sample period raises streams by almost 20 million and is worth between 116 000 and 163 000 Inclusion on New Music Friday lists substantially raises the probability of song success including for new artists

**MY MUSIC BUSINESS: PRE-RELEASING STEPS and SPOTIFY ALGORITHM the Essential Guide** Palomine, 2022-07

*Evaluation and Credentialing in Digital Music Communities* H. Cecilia Suhr, 2014-11-07 In this MacArthur Report Suhr explores digital music communities use of evaluation games and digital badges for both casual music evaluators and musicians The first case study focuses on audience evaluation via playing Spotify's Hit or Not game where game players

evaluate a song's hit potential. Suhr explores the gamification of learning and evaluation when the act of music evaluation turns into a game: what do the players learn and what may be the implications of this type of evaluation? The second more in-depth case study on Indaba Music examines the process of gaining badges through involvement in contests. Suhr questions whether or not gaining badges holds significance for musicians. Taken as a whole, this report analyzes how digital badges are perceived by both music listeners and musicians. To what extent can digital badges be an effective way to represent and credit musicians' accomplishments and merits? What are the emerging challenges, benefits, and shortcomings in the use of digital badges as an alternative evaluation mechanism? How do the uses of digital badges in the context of assessing creativity intersect or diverge with the practices related to education and other non-creative fields? Provided by publisher.
