Victorian literature for audiences of all ages provides a broad foundation upon which to explore complex and evolving ideas about young people. In turn, this collection argues contemporary works for young people that draw on Victorian literature and culture ultimately reflect our own disruptions and upheavals particularly as they relate to child and adolescent readers and our experiences of them. The essays therein suggest that we struggle now as the Victorians did then to assert a cohesive understanding of young readers and that this lack of cohesion is a result of or a parallel to the disruptions taking place on a larger even global scale *Gregory Benford*

George Slusser, 2014-02-28 Gregory Benford is perhaps best known as the author of Benford's law of controversy. Passion is inversely proportional to the amount of real information available. That maxim is a quotation from *Timescape*, Benford's Nebula and Campbell Award winning 1980 novel which established his work as an exemplar of hard science fiction dedicated to working out the consequences of modern science rather than substituting pseudoscience for fantasy. Like many other current science fiction writers, Benford has tackled the major genres: space travel, time travel, technology running amok, prolonged longevity, searing apocalyptic cosmic events, and alien life which he theorizes to be more likely viral than intelligent. An astrophysicist by training and profession, Benford has published more than twenty novels, over one hundred short stories, some fifty essays, and myriad articles that display both his scientific rigor as well as a recognition of literary traditions. In this study, George Slusser explores the extraordinary seemingly inexhaustible display of creative energy in Gregory Benford's life and work. Presenting Benford's ideas on science and the writing of science fiction, the volume addresses the writer's literary production and his place in contemporary science fiction. By identifying direct sources and making parallels with other works and writers, Slusser reveals the vast scope of Benford's knowledge both of literature and of the major scientific and philosophical issues of our time. Slusser also discusses Benford's numerous scientific articles and nonfiction books and includes a new interview with Benford.

Disputing the Deluge Darko Suvin, 2021-12-02 Featured on the 2021 Locus Recommended Reading List. For over 50 years, Darko Suvin has set the agenda for science fiction studies through his innovative linking of sci-fi to utopian studies, formalist and leftist critical theory, and his broader engagement with what he terms political epistemology. *Disputing the Deluge* joins a rapidly growing renewal of critical interest in Suvin's work on sci-fi and utopianism by bringing together in a single volume 24 of Suvin's most significant interventions in the field from the 21st century with an Introduction by editor Hugh O'Connell and a new preface by the author. Beginning with writings from the early 2000s that investigate the function of literary genres and reconsider the relationship between science fiction and fantasy, the essays collected here, each a brilliant example of engaged thought, highlight the value of sci-fi for grappling with the key events and transformations of recent years. Suvin's interrogations show how speculative fiction has responded to 9/11, the global war on terror, the 2008 economic collapse, and the rise of conservative populism, along with contemporary critical

utopian analyses of the Capitalocene the climate crisis COVID 19 and the decline of democracy By bringing together Suvin s essays all in one place this collection allows new generations of students and scholars to engage directly with his work and its continuing importance and timeliness **First Aid to the Opera-goer** Mary Watkins Cushing,1924 **New**

Boundaries in Political Science Fiction Donald M. Hassler,Clyde Wilcox,2008 This book offers an interpretation of the evolution of a growing genre in literary film and television As a follow up to their 1997 collection Political Science Fiction Hassler and Wilcox have assembled twenty four noted international scholars representing diverse fields of inquiry to assess the influential voices and trends from the past decade in New Boundaries in Political Science Fiction The terrors and technologies that permeate our daily lives have changed radically in the past decade further highlighting the underlying speculations on our contested future that remain the core of this genre In surveying the vast expanse of politically charged science fiction of recent years the editors posit that the defining dilemma for these tales rests in whether identity and meaning germinate from progressive linear changes or progress or from a continuous return to primitive realities of war death and the competition for survival The discussion of political implications ranges among writers from H G Wells Robert A Heinlein Ursula Le Guin and Isaac Asimov to more radical recent voices such as Iain M Banks William Gibson Joanna Russ Philip K Dick and China Mieville While emphasizing the literature the collection also addresses political science fiction found on film and television from the original Star Trek through the newest incarnation of Battlestar Galactica Foundation ,1983 *Frontiers Past and Future* Carl Abbott,2006 Abbott offers a fruitful new way to read science fiction one that also greatly enriches our understanding of western history and its impact on our collective imagination Detailing the overlap of science fiction and western fiction especially relating to their mutual interest in and concerns about frontier expansionism he reveals an unsuspected common ground that informs the writings of both camps Reviewing the work of many Hugo and Nebula Award winners as well as drawing upon popular film and television series like the Buck Rogers serials Abbott s study journeys across the far reaches of science fiction s universe Music and Musicians ,1959 **A History of Art for**
