## **Mat I Ditia:**

Science of the Child in Late Imperial and Early Soviet Russia Andy Byford, 2020-02-27 Between the 1880s and the 1930s children became the focus of unprecedented scientific and professional interest in modernizing societies worldwide including in the Russian Empire and then the Soviet Union. Those who claimed children as special objects of investigation were initially spread across a network of imperfectly professionalized scholarly and occupational groups based mostly in the fields of medicine education and psychology. From their various perspectives they made ambitious claims about the contributions that their emergent expertise made to the understanding of and intervention in human bio psycho social development. The international movement that arose out of this catalyzed the institutionalization of new domains of knowledge including developmental and educational psychology special needs education and child psychiatry. Science of the Child charts the evolution of the child science movement in Russia from the Crimean War to the Second World War. It is the first comprehensive history in English of the rise and fall of this multidisciplinary field across the late Imperial and Soviet periods. Drawing on ideas and concepts emanating from a variety of theoretical domains the study provides new insights into the concerns of Russia's professional intelligentsia with matters of biosocial reproduction and investigates the incorporation of scientific knowledge and professional expertise focused on child development into the making of the welfare warfare state in the rapidly changing political landscape of the early Soviet era.

The Body Soviet Tricia Starks, 2009-01-06 In 1918 the People's Commissariat of Public Health began a quest to protect the health of all Soviet citizens but health became more than a political platform or a tactical decision. The Soviets defined and categorized the world by interpreting political orthodoxy and citizenship in terms of hygiene. The assumed political social and cultural benefits of a regulated healthy lifestyle informed the construction of Soviet institutions and identity. Cleanliness developed into a political statement that extended from domestic maintenance to leisure choices and revealed gender ethnic and class prejudices. Dirt denoted the past and poor politics health and cleanliness signified mental acuity political orthodoxy and modernity. Health though essential to the revolutionary vision and crucial to Soviet plans for utopia has been neglected by traditional histories caught up in Cold War debates. The Body Soviet recovers this significant aspect of Soviet thought by providing a cross disciplinary comparative history of Soviet health programs that draws upon rich sources of health care propaganda including posters plays museum displays films and mock trials. The analysis of propaganda makes The Body Soviet more than an institutional history it is also an insightful critique of the ideologies of the body fabricated by health organizations. A masterpiece that will thoroughly fascinate and delight readers. Starks's understanding of propaganda and hygiene in the early Soviet state is second to none. She tells the stories of Soviet efforts in this field with tremendous insight and ingenuity providing a rich picture of Soviet life as it was actually lived.
