Material World Glass:

Materials World ,2000 *In the Looking Glass* Rebecca K. Shrum,2017-08-30 An utterly fascinating reading of the multiple uses and meanings of mirrors among European Americans African Americans and Native Americans Journal of Social History What did it mean Rebecca K Shrum asks for people long accustomed to associating reflective surfaces with ritual and magic to become as familiar with how they looked as they were with the appearance of other people Fragmentary histories tantalize us with how early Americans people of Native European and African descent interacted with mirrors Shrum argues that mirrors became objects through which white men asserted their claims to modernity emphasizing mirrors as fulcrums of truth that enabled them to know and master themselves and their world In claiming that mirrors revealed and substantiated their own enlightenment and rationality white men sought to differentiate how they used mirrors from not only white women but also from Native Americans and African Americans who had long claimed ownership of and the right to determine the meaning of mirrors for themselves Mirrors thus played an important role in the construction of early American racial and gender hierarchies Drawing from archival research as well as archaeological studies probate inventories trade records and visual sources Shrum also assesses extant mirrors in museum collections through a material culture lens Focusing on how mirrors were acquired in America and by whom as well as the profound influence mirrors had both individually and collectively on the groups that embraced them *In the Looking Glass* is a piece of innovative textual and visual scholarship A superb reflection of the many meanings held by an object usually taken for granted Highly recommended Choice Material Design Thomas Schröpfer,2012-12-13 The approach of Informing Architecture by Materiality opens the way to an innovative use of materials in the design professions Taking material qualities and properties such as texture elasticity transparency and fluidity as a point of departure the concept described and employed here transcends the conventional definitions of building materials Instead the focus is on a multitude of material operations like folding and bending carving and cutting weaving and knitting mirroring and screening The featured design strategies and methods address established and new materials alike They are applied both to the scale of the detail and the entire building The examples comprise prototype structures as well as large building projects Eight chapters deal with surfaces and layers joints and junctions weaving and texturing nanoscale transformations responsiveness the integration of ephemeral factors like wind and light as well as material collections providing professional resources Written by renowned experts in this field the book features many examples from international contemporary architecture The introductory part provides the conceptual background while a final chapter describes consequences for pressing issues of today like sustainability or life cycle assessment Touch It! Materialized Identities in Early Modern Culture, 1450-1750 Susanna Burghartz,Lucas Burkart,Christine

Göttler,Ulinka Rublack,2025-10-01 This collection embraces the increasing interest in the material world of the Renaissance and the early modern period which has both fascinated contemporaries and initiated in recent years a distinguished historiography The scholarship within is distinctive for engaging with the agentic qualities of matter showing how affective dimensions in history connect with material history and exploring the religious and cultural identity dimensions of the use of materials and artefacts It thus aims to refocus our understanding of the meaning of the material world in this period by centring on the vibrancy of matter itself To achieve this goal the authors approach the material through four themes glass feathers gold paints and veils in relation to specific individuals material milieus and interpretative communities In examining these four types of materialities and object groups which were attached to different sensory regimes and valorizations this book charts how each underwent significant changes during this period Documents ,1998 *The Glass Industry* ,1928
