Maternal Instinct:

Mother Nature Sarah Blaffer Hrdy, 1999 We are tempted to think of maternal instinct as a quality a woman has or lacks But the belief that mothers instinctively nurture their offspring one of the West's most cherished ideals and a view widely accepted even in scientific circles has become increasingly controversial Mother Nature presents a radical new way of understanding how mothers act and why and how this new understanding is changing the way scientists think about how evolution works Drawing on anthropology history literature developmental psychology and animal behavior Sarah Hrdy examines the distinct biological and genetic elements that constitute maternal instinct She strips away the biases implicit in conventional stereotypes of female nature to give us very different and provocative perspectives on maternal ambivalence the links between maturity and ambition mother love and sexual love and why age old tensions between the sexes persist and are being played out today in efforts to control women's reproductive choices Combining decades of research with her own experience as a mother Hrdy makes clear in this remarkable book what it means from a historical and evolutionary perspective to be a mother and explains how this knowledge has transformed our understanding of human development and behavior

Mom Genes Abigail Tucker, 2021-04-27 Everyone knows how babies are made but scientists are only just beginning to understand the making of a mother Mom Genes reveals the hard science behind our tenderest maternal impulses tackling questions such as whether a new mom's brain ever really bounces back why mothers are destined to mimic their own moms or not and how maternal aggression makes females the world's most formidable creatures Publisher's description

[Uncovering the Act of Maternal Infanticide from a Psychological, Political, and Jungian Perspective](#) Brooke Laufer, 2024-07-02 Using a wide range of disciplinary backgrounds Laufer examines the topic of maternal infanticide through the lens of Jungian theory and presents an integrated and forensic view of this issue as an aggregate of personal and political moments and as a feminine and feminist outcry urging human evolution The first part of the book will dissect the identity of the infanticidal mother and the Death Mother archetype with the author providing firsthand accounts

of patients that she has worked with in her professional career The second part of the book focuses on interpreting that act of maternal infanticide and these chapters will look to the construct of patriarchal Motherhood as a way of explaining the drive and actions of an infanticidal mother The third and final section of the book takes the concept of evolution and transmutation a step further and addresses what is required in our modern state for the event of maternal infanticide This is an important new book for Jungian and analytic clinicians and scholars with an interest in maternal archetypes as well as psychologists and psychiatrists who specialize in perinatal mental health It would also be appropriate for forensic psychologists and legal analysts and academics and clinicians in the fields of women s health and studies
