Managing Your Maternity Leave Meg Wheatley, Marcie Schorr Hirsch, 1983    Mothers on the Job Lise Vogel, 1993 Women's increasing demands for protection and benefits in the workplace especially with regard to maternity leave have sparked more than a century of controversy among feminists on how best to serve the needs of working women This debate continues to divide the feminist community One side believes women are better served by emphasizing equality with men pregnancy should be treated like any other disability The other side wants to recognize difference special provisions should apply only to pregnant women Lise Vogel examines the evolution of this debate on pregnant women in the workplace looking at theoretical as well as practical implications Vogel begins by assessing the history of the contemporary debate on pregnancy policy in the U S Since the middle of the nineteenth century American women have been torn by the contradictory demands of motherhood and the workplace Pregnancy was grounds for dismissal from work and few employers took action to protect pregnant workers To counter this early twentieth century feminists and reformers emphasized female specificity and women's special role In the 1960s activists adopted a strategy framed on equality which moved away from the earlier

emphasis on differences The use of equality strategies to cover the female specific phenomenon of pregnancy turned out to have problems Now women's special needs were denied and ignored These difficulties and a series of court cases in the 1980s triggered debates in the feminist legal community Vogel looks at the litigation and debates which pitted advocates of gender neutral strategies against critics who called for female specific policies Vogel argues that in terms of practical benefits women will be served best by a gender neutral approach to pregnancy policy She encourages equality advocates to recognize the inherent diversity of individuals and points out the need to be sensitive to individual factors of race and class as well as sex

**Fixing Parental Leave** Gayle Kaufman,2020-01-21 A real world solution for parental leave that promotes gender equality at work and at home What do Papua New Guinea Suriname and the United States have in common These three nations are the only ones that do not offer some form of parental leave to new parents The US lags far behind the rest of the world on this important issue raising questions about our commitment to gender equality and the welfare of our families In Fixing Parental Leave Gayle Kaufman takes an in depth look at parental leave policies in the US the UK and Sweden and evaluates the benefits and drawbacks of leave policies in each country She finds that there is more to parental leave policies than whether a country provides time off around the birth or adoption of a child While most policies are designed to help women return to work this is only half of the puzzle The second half requires men to be meaningful partners by encouraging them to take equal time at home Ultimately Kaufman arrives at a rational solution that will promote gender equity through a policy that enables parents at companies of all sizes to spend six months with their new child
