The Math Chat Book Frank Morgan, 2000-04-27 A collection of mathematical questions and answers about everyday events familiar to everybody

Semiotics as a Tool for Learning Mathematics Adalira Sáenz-Ludlow, Gert Kadunz, 2015-12-17 Semiotics as a Tool for Learning Mathematics is a collection of ten theoretical and empirical chapters from researchers all over the world who are interested in semiotic notions and their practical uses in mathematics classrooms Collectively they present a semiotic contribution to enhance pedagogical aspects both for the teaching of school mathematics and for the preparation of pre service teachers This enhancement involves the use of diagrams to visualize implicit or explicit mathematical relations and the use of mathematical discourse to facilitate the emergence of inferential reasoning in the process of argumentation It will also facilitate the construction of proofs and solutions of mathematical problems as well as the progressive construction of mathematical conceptions that eventually will approximate the concept s encoded in mathematical symbols These symbols hinge not only of mental operations but also on indexical and iconic aspects aspects which often are not taken into account when working on the meaning of mathematical symbols For such an enhancement to happen it is necessary to transform basic notions of semiotic theories to make them usable for mathematics education In addition it is also necessary to back theoretical claims with empirical data This anthology attempts to deal with such a conjunction Overall this book can be used as a theoretical basis for further semiotic considerations as well as for the design of different ways of teaching mathematical concepts

Math Horizons ,1997 Essays In Computer-Supported Collaborative Learning Gerry Stahl, 2016-01-26 These essays are some of the most important papers co written with my colleagues that supplement the discussion of CSCL research in the published books These chapters take the discussion in specific directions They begin with my general reflections on the importance of CSCL as a research field situating my work on the VMT Project and my theory of group cognition within the field of CSCL They describe the VMT research project including its research approach technology pedagogy and analysis methods Mostly they discuss in some detail the findings that have emerged from the VMT Project about the nature of online interaction in that type of CSCL setting The volume concludes with reports of work in the project and future directions that were underway
