The Art of Studio Gainax Dani Cavallaro, 2015-01-27 Formed by a small group of university students in the early 1980s, Studio Gainax is now one of the most adventurous and widely esteemed anime companies on the scene. And it is fascinating for its unique approach to animation. Formal experimentation, genre straddling, self-reflexivity, unpredictable plot twists, a gourmet palate for stylishness, proverbially controversial endings, and a singularly iconoclastic worldview are some of the hallmarks. This documentation of the studio's achievements provides a critical overview of both the company and its films, in-depth examinations of particular titles that best represent the company's overall work, including television series such as *Nadia: The Secret of Blue Water* and *Neon Genesis Evangelion*, and feature films such as *Royal Space Force: The Wings of Honneamise* and *Gunbuster vs. Diebuster*. Each chapter highlights the contribution made by a specific production to the company's progress.

Proceedings of the International Conference on Learning and Advanced Education (ICOLAE 2022) Mauliy Halwat Hikmat, Yasir Sidiq, Naufal Ishartono, Yunus Sulistyono, Patmisari, Susiati, 2023-08-29 This is an open access book. The COVID-19 pandemic in the last two years has influenced how educational systems work. Online learning became the primal policy taken by all institutions in the world to lower the risk of the virus spread. Despite the drawbacks of the online learning, teachers and students were accustomed with the distant learning through web meetings. Learning Management Systems (LMS) and other online learning platforms. In that time, topics under digital learning and education 5.0 were the main stakes in academic disseminations. This year, some institutions start to conduct their teaching and learning process classically as before the pandemic, others are still continuing online, and not few are in hybrid. This leaves a question: what learning reform should be made in post-pandemic era? This conference invites researchers, experts, teachers, and students to discuss the coping solutions of the question. It is important for them to contribute to the understanding of reimagining online education for better futures, innovative learning design, new skills for living and working in new times, global challenge of education, learning and teaching with blended learning, flipped learning, integrating life skills for students in the curriculum, developing educators for the future, distance learning, humanities learning in the digital era, assessment and measurement in education, challenges and transformations in education, technology in teaching and learning, new learning and teaching models. Not limited to these, scholars may add another interesting topic related to learning reform in post-pandemic era to present.
