Narrative Comprehension A Discourse Perspective:

Narrative Comprehension Catherine Emmott,1997 Despite the current explosion of interest in cognitive linguistics there has so far been relatively little research by cognitive linguists on narrative comprehension Emmott draws on insights from discourse analysis and artificial intelligence to present a detailed model of how readers build maintain and use mental representations of fictional contexts and how they keep track of characters and contexts within a complex changing fictional world The work has implications for linguistic theory since it questions several long held assumptions about anaphora arguing for a levels of consciousness model for the processing of referring expressions The book begins with a summary of current issues in text processing theory and a discussion of the methodological importance of recognizing the hierarchical structure of discourse The core of the book explores the significance of contextual monitoring in narrative comprehension and looks particularly at the cognitive demands placed on readers by flashbacks Later chapters examine the implications of contextual monitoring for reference theory and for a literary linguistic model of narrative text types The study focuses on anaphoric pronouns in narratives assessing the accumulated knowledge required for readers to interpret these key grammatical items **Narrative Progression in the Short Story** Michael Toolan,2009-01-14 One of our most valuable capacities is our ability partly to predict what will come next in a text But linguistic understanding of this remains very limited especially in genres such as the short story where there is a staging of the clash between predictability and unpredictability This book proposes that a matrix of narrativity furthering textual features is crucial to the reader s forming of expectations about how a literary story will continue to its close Toolan uses corpus linguistic software and methods and stylistic and narratological theory in the course of delineating the matrix of eight parameters that he sees as crucial to creating narrative progression and expectation The book will be of interest to stylisticians narratologists corpus linguists and short story scholars **Routledge Encyclopedia of Narrative Theory** David Herman,Manfred Jahn,Marie-Laure Ryan,2010-06-10 The past several decades have seen an explosion of interest in narrative with this multifaceted object of inquiry becoming a central concern in a wide range of disciplinary fields and research contexts As accounts of what happened to particular people in particular circumstances and with specific consequences stories have come to be viewed as a basic human strategy for coming to terms with time process and change However the very predominance of narrative as a focus of interest across multiple disciplines makes it imperative for scholars teachers and students to have access to a comprehensive reference resource *The Routledge Companion to Literature and Cognitive Studies* Jan Alber,Ralf Schneider,2025-07-31 The Routledge Companion to Literature and Cognitive Studies offers a comprehensive survey of cognitive approaches to literature introducing the influential theoretical tools and latest developments in this vigorously multi disciplinary field with leading scholars illuminating the cognitive affective and bodily dimensions of literary reading Comprised three main sections this Companion oversees the history of the field core issues and topics and the vital new

Taking in Language Carla Contemori,Petra Hendriks,Franziska Köder,Emar Maier,Jorrig Vogels,Sonja Zeman,2023-05-02 *Narrative Inquiry* ,2001 Studies in the Literary Imagination ,2009 **New Approaches in Text Linguistics** Sylvie Mellet,Dominique Longrée,2009 Over the last years research in text linguistics has yielded insights into different levels of methodological reflection and practice resulting in new issues for investigation On the one hand the development of computerized corpora and hypertextual reading has reminded researchers that the text is a complex object both linear and network like and largely shaped by its context how can analysis grapple with such a complexity On the other hand the processing of computerized corpora raises new methodological questions about the textual units chosen for analysis or about the use of grammatical categories as tools for stylistic and generic characterization of texts This volume hopes to offer some constructive reflection on these challenging issues The selected papers either demonstrate the value of some innovative method of analysis through concrete applications or develop strong and well argued epistemological positions illustrated with examples Interdisciplinary contributions are also represented when dealing with regulating concepts such as corpus inter co text speech genre etc various domains including stylistics genetic criticism contrastive research didactic approaches statistical linguistics and discourse analysis share a common interest with text linguistics **Queneau's Fictional Worlds** Nina Bastin,2002 Queneau s novels are extremely popular for their wit and linguistic ingenuity but they also pose a serious challenge to the reader s reconstruction of the fictional world which can often go unrecognised This study takes us back to the fundamental elements of Queneau s worlds demonstrating how his idiosyncratic style can affect the reader s mental processing of the text world building It also demonstrates the internal organisation of Queneau s fictional worlds Drawing on cognitive discourse models and the philosophical notion of possible worlds the book provides both comparative and general analysis of Queneau s novels and case studies of Le Vol d lcare Les Fleurs bleues and Loin de Rueil exposing the resistance that these worlds present to stable cognitive reconstruction notably through the subversion of world boundaries world play and the positing of impossible spaces heterotopiae Contents Survey of the critical field of Queneau studies Application of the principles of Cognitive Discourse Grammar to Queneau s novels A generalised reinterpretation of specific features of the novels in terms of their effects upon cognitive text processing world building Investigation into the internal organisation of Queneau s fictional worlds and the problems they present for reconstruction by the reader notably the subversion of world boundaries world play and the positing of impossible spaces heterotopiae A theoretical analysis of the interplay between cognitive models and the philosophical notion of possible worlds Extensive close readings of three of Queneau s novels Le Vol d Icare Les Fleurs bleues and Loin de Rueil Extension of the notion of world play to describe Queneau s wider writing practice Inner Worlds Albert H. Kamp,2004 This book first establishes a cognitive linguistic approach that can be instructively applied to the text of Jonah A subsequent examination of the nuances of the Hebrew text reveals how the author creates an inner world for the reader in which Jonah s perspectives on his misfortunes are contrasted with the transcendent
