Man Nature And Technology:

Man, Nature and Technology Erik Baark, Uno Svedin, 1988-06-18 *Man, Nature and Technology* Erik Baark, Uno Svedin, 2014-01-14 *Man, Nature and Technology* Erik Baark, Uno Svedin, 1988 *The Closing Circle* Barry Commoner, 2014-03-05 From Chapter One This book begins with the ecosphere the setting in which civilization has done its great and terrible deeds Then it moves to a description of some of the damage we have done to the ecosphere to the air the water the soil However by now such horror stories of environmental destruction are familiar even tiresome Much less clear is what we need to learn from them and so I have chosen less to shed tears for our past mistakes than to try to understand them Most of this book is an effort to discover which human acts have broken the circle of life and why I trace the environmental crisis from its overt manifestations in the ecosphere to the ecological stresses which they reflect to the faults in productive technology and in its scientific background that generate these stresses and finally to the economic social and political forces which have driven us down this self destructive course All this in the hope and expectation that once we understand the origins of the environmental crisis we can begin to manage the huge undertaking of surviving it *Nature, Technology, and Society* Victor Ferkiss, 1994-11 Traces cultural attitudes toward the environment and technology across the span of human civilization While all human societies have enlisted technologies to control nature the last hundred years have witnessed the technological exploitation and destruction of natural resources on an unprecedented scale As environmental groups and the scientific community sound the alarm about deforestation global warming and ozone depletion the obvious question arises how did we get where we are today In *Nature Technology and Society* Victor Ferkiss sets out to answer this central question arguing that we cannot escape from our present environmental predicament unless we understand the ideas which have created it Ferkiss asks the basic questions concerning humans and their relationship to the environment He traces cultural attitudes towards the environment from early mankind to the present day This fascinating book is distinctive both in its comprehensiveness and in its attempt to place side by side influential thinkers and movements with varied views on these issues *The Technology Monthly and Harvard Engineering Journal* , 1916 *Philosophy and Technology* Carl Mitcham, Robert Mackey, 1972 *Philosophy and technology* is a comprehensive collection of selected readings treating technology as a general philosophical problem Theses essays by such eminent philosophers as Lewis Mumford Jacques Ellul Jos Ortega y Gasset and Friedrich Dessauer are divided into five major categories conceptus issues ethical and political critiques religious critiques existential critiques and metaphysical studies Each of these essays present an in depth analysis of major arguments and ideas relevant to the particular area and is designed to bring out opposing viewpoints The essays span the period from 1927 to the present Read chronologically they trace the development of the philosophy of technology as a specific discipline *Philosophy and Technology* will serve as excellent source material for undergraduate and graduate students interested in this field as well as in political philosophy philosophy of science philosophy of religion epistemology
