Management Consultancy Training Development International Labour Organisation, 1981 **The Organization of the Expert Society** Andreas Werr, Staffan Furusten, 2016-12-01 It is often claimed that we live in an expert society a society where more and more individuals take expert roles in increasingly narrow fields In contrast to more traditional experts most of these new experts lack generally accepted mechanisms for the certification and legitimization of their expertise This book focuses on these new as well as established experts and the efforts undertaken to secure and legitimate their expertise We view these efforts as organizing attempts and study them on four different levels the society the market the organization and the individual Based on empirical studies on these four levels of analysis The Organization of the Expert Society makes the argument that current organizing initiatives in the expert society are based in an objectifying view of expertise that risks

concealing and downplaying key aspects of expertise Well intended organizing initiatives in the expert society thus run the risk of promoting ignorance rather than securing expertise Focusing on a current general and global phenomenon the rise and organization of an expert society The Organization of the Expert Society will be key reading for scholars academics and policy makers in the management fields of Organizational Theory Management Consulting Organizations Society Critical Management Studies as well as the disciplines of Sociology Political Science and Social Anthropology *How to Choose and Use a Management Consultant* Max James,1989

Value-Based Consulting F. Czerniawska,2002-04-18 This book will complement the author s book on the future of Management Consultancy While that book examined the structure and trends in the industry this book tackles the more micro questions about how consultants understand what clients value and create value for clients The author is a leading expert on management consulting and this book will help management consultants to do their jobs successfully

Managing Information ,2002 **Building the New Managerialist State** Denis Saint-Martin,2000 In the 1980s and 1990s the world of governance witnessed a far reaching change from the Weberian model of bureaucracy to the new managerialism a term used to describe the group of ideas imported from business and mainly brought into government by management consultants Over the past fifteen years the British French and Canadian governments have spent growing sums of money on consulting services and as a result policy makers inside the state have increasingly been exposed to the business management ideas that consultants bring into the public sector Nevertheless there are major differences in the extent to which reformers in the three countries embraced these ideas in the process of bureaucratic reform Accordingly this is a book about policy change and variation It seeks to explain why the changes produced by the new managerialism have been more radical in some countries than in others Building the New Managerialist State shows that the political reception given by governments to managerialist ideas has been significantly shaped by the openness of policy making institutions to outside expert knowledge and on the organization development and social recognition of management consultancy
