Bedeian, 2018-04-17 First published in 1993 This volume compiles the autobiographies of the management discipline s most distinguished laureates Prior to this publication the available management literature provided little insight into the personal and intellectual lives the frustrations as well as the triumphs of the individuals in the management discipline Although such understanding could be conveyed in many forms perhaps the most intimate and fascinating of these for gaining behind the scenes insights is the autobiography Thus the autobiographies in this volume as in the five companion volumes offer the reader not only a glimpse of the subjective determinants and personal experiences of the management discipline s most distinguished laureates but also a deeper understanding of what management is and what it is becoming The various accounts reflect a diversity of approaches interests and experiences

The Manipulators Allan W. Lerner, 2021-12-29 Originally published in 1990 this volume had two purposes One was to shed some light on the impact that manipulateness has on modern institutional processes The other was to illustrate the importance of attempting militantly interdisciplinary work on themes that run through a variety of social sciences and related disciplines as a way of breaking down excessively stifling disciplinary barriers Manipulateness is a connotation laden notion with shifting meanings across the variety of action contexts levels of analysis and disciplinary orientations It absorbs the idea of strategic mindedness rule exploitation situational advantage seeking tampering with structure and context and control of the action climate In a way it is a very contemporary interpretation of the theme of power melding images of control with the experience of pervasive social ambiguity
