

MANAGING THE DATA RESOURCE

Data are now recognized as a major organizational resource, to be managed like other assets such as land, labor, and capital. Chapter 4 will be entirely devoted to the data resource. For now, let us note that a DBMS is an important software tool for managing the data resource. Another software tool for managing the data resource is a data dictionary/directory (DD/D), which is a repository of data definitions that is shared among all the users. Such a central catalog is used by the DBMS and system users whenever the meaning, storage format, integrity rules, security clearances, and physical location of data need to be discovered. The DD/D is similar to an inventory accounting system for a parts warehouse—but in this case for a data warehouse, or a database. Many modern DBMSs have a built-in DD/D capability.

CASE Tools

It was originally predicted that CASE tools—our fourth type of support software—would have a major impact on computer professionals, and that has been true for some professionals in some firms. However, the growth of the use of CASE tools
