Managing High Intensity Internet Projects:

Managing High-intensity Internet Projects Edward Yourdon,2002 In Managing High Intensity Internet Projects Ed Yourdon delivers instant practical solutions for virtually every challenge you'll face in leading today's high intensity Internet time projects Yourdon's breakthrough management techniques cover strategies, politics, processes, tools, and the entire development lifecycle from requirements through coding, monitoring progress through testing and delivery Methods of IT Project Management, Fifth Edition Jeffrey L. Brewer, Kevin C. Dittman, Paul J. Thomas, 2025-09-15 Designed for graduate advanced undergraduate and practitioner project management courses with an information technology focus. Methods of IT Project Management is designed around the Project Management Body of Knowledge (PMBOK) incorporating material from the latest seventh edition while still maintaining the book's process approach. The text provides students with all the concepts, techniques, artifacts, and methods found in the leading project management reference books and modern development methodologies (agile, hybrid, and traditional) while also conveying practical knowledge that can immediately be applied in real world settings. This book uniquely integrates cutting edge knowledge and techniques from the industry ensuring that readers are equipped with the most current and relevant skills. Unlike other books in this area, the material is organized according to the sequence of a generic project life cycle from project selection to initiation, planning, execution, control, and iteration or project closeout. Following this life cycle approach as opposed to covering the material by knowledge area or project performance domain allows new learners to simultaneously study project management concepts and methods as they develop skills they can use immediately during and upon completion of the course. The text's structure also allows different programs to use the book during real world projects Methods of IT Project Management, Fourth Edition Jeffrey L. Brewer, Kevin C. Dittman, 2022-10-15 Designed for graduate advanced undergraduate and practitioner project management courses with an information technology focus. Methods of IT Project Management is designed around the Project Management Body of Knowledge (PMBOK) incorporating material from the latest seventh edition while still maintaining the book's process approach. The text's structure also allows different programs to use the book during real world student projects Methods of IT Project Management Jeffrey L. Brewer, Kevin C. Dittman, 2018-09-15 Methods of IT Project Management Third Edition is built around the latest version of

the Project Management Body of Knowledge PMBOK and covers best practices unique to the IT field. It is designed for use in graduate advanced undergraduate and professional IT project management courses to prepare students for success in the IT field and to prepare them to pass the Project Management Professional PMP certification exam given by the Project Management Institute PMI the world's leading certification in the field of project management. Unlike other project management texts Methods of IT Project Management follows the IT project life cycle from overview and initiation to execution control and closing. An enterprise scale IT project macro case study runs through the entire text. Each section presents mini cases based on the larger case and focuses on new concepts presented in each section. Readers gain practical knowledge of IT project management workflows at scale while building technical knowledge and skills required to pass the PMP. Mini case studies encourage deep retention prompt rich in class discussion and challenge more advanced students and professionals alike. Unique skills covered can be put directly into practice. An appendix presents practice study questions and advice on preparing for and passing the PMP exam. The revised third edition includes expanded coverage of agile system development methodologies leadership and negotiation skills and process maturity models.
