Managing Small-scale Fisheries ,2001 *Managing Small-scale Fisheries* Fikret Berkes,2001 Managing Small Scale Fisheries Alternative directions and methods *Small-scale Fisheries Management* Robert S. Pomeroy,Neil Andrew,2011 This book contains 12 chapters on the development management marketing effects of climatic change and poverty reduction in small scale fisheries in developing countries and rural areas

Improving our knowledge on small-scale fisheries:

data needs and methodologies Food and Agriculture Organization of the United Nations,2017-01-01 Small scale fisheries play an important role in contributing to food security nutrition livelihoods and local and national economies However there is often limited data and information available or not easily accessible on their contributions and hence small scale fisheries tend to be overlooked and marginalized in policy processes leading to low levels of support for the sector The Voluntary Guidelines for Securing Sustainable Small Scale Fisheries in the Context of Food Security and Poverty Eradication the SSF Guidelines adopted by the FAO Committee on Fisheries COFI in 2014 provide a policy framework for how to ensure sustainability for small scale fisheries through a holistic and integrated approach However this transformational process needs substantial support to take place and be successful which may be difficult to obtain in the absence of better data and information on the socio economic contributions of small scale fisheries For this reason a new study has been proposed by FAO and WorldFish to build upon the 2012 World Bank FAO and WorldFish Center report Hidden Harvest The Global Contribution of Capture Fisheries The new study would deepen the knowledge and encourage data sharing on small scale fisheries and their socio economic contributions and also aim to make policy and decision makers aware of the sector's importance

Co-management of fisheries and mangroves as a pathway to the ecosystem approach to fisheries FAO,2024-10-07 The CFI programme a global partnership between FAO UNDP UNEP Conservation International the World Bank and the WWF has developed three legacy Global Knowledge Products GKPs to consolidate experience and lessons learned and to make its successful approaches and tangible impacts sustainable beyond the end of its five year cycle This e book is the first of the series Within its overall objective of demonstrating holistic ecosystem based management and improved governance of small scale coastal fisheries the CFI has learned that co management schemes that empower local communities women as well as men to act as stewards of their own resources can result in the sustainable use of fragile habitats such as mangrove forests in ways that can guarantee thriving livelihoods and conservation at the same time This e book describes the methodologies and results achieved by the CFI in Indonesia Latin America Ecuador Peru and West Africa Cabo Verde Côte d'Ivoire Senegal which can be adapted to local contexts anywhere in the world It is aimed at national and international policymakers practitioners and development agencies and is enriched with testimonies from beneficiaries across these geographies

Monitoring and Managing Queen Conch Fisheries Paul Medley, 2008 This publication presents guidelines on the requirements for responsible management of the fisheries exploiting Caribbean queen conch *Strombus gigas* with particular emphasis on the requirements to comply with the relevant regulations of the Convention on International Trade in Endangered Species of Wild Fauna and Flora CITES This manual describes the basic fisheries management cycle which includes development and interpretation of policy the need for management controls to regulate fishing activities data collection and analysis decision making enforcement of and compliance with the management controls and regular feedback and review of the management system It provides general guidance on each of those steps for the queen conch fisheries of the Caribbean It also provides three examples of management systems for industrial artisanal and non directed fisheries Publisher's description [Guidelines for Designing Data Collection and Sharing Systems for Co-managed Fisheries](#), 2005

Demographic and Conservation Implications of Alternative Foraging Strategies in Juvenile Loggerhead Turtles (*Caretta caretta*) on the North Pacific Ocean S. Hoyt Peckham, 2008 *Proceedings of 31st Scientific Meeting of the Association of Marine Laboratories of the Caribbean (AMLC)* Association of Marine Laboratories of the Caribbean. Scientific Meeting, 2005 *Strengthening Organizations and Collective Action in Fisheries* Daniela Coswig Kalikoski, Nicole Franz, 2014 Strengthening organizations and collective action in small scale fisheries SSFs is crucial to safeguarding fishers livelihoods and food and nutrition security as well as to fighting poverty and vulnerability The crucial role of organizations in SSFs was underscored during the 2008 Global Conference on Small scale Fisheries held in Bangkok Thailand and the consultative workshops and related events supporting the development of the international guidelines for securing sustainable small scale fisheries SSF Guidelines The United Nations declared 2012 the International Year of Cooperatives with the theme Cooperative Enterprises Build a Better World This provided further impetus for championing fishers organizations and collective action as important instruments and drivers in promoting responsible fisheries and achieving the twin objectives of human and ecosystem well being In this context the workshop Strengthening Organizations and Collective Action in Fisheries was held at FAO Rome Italy on 18-20 March 2013 It was attended by 26 SSF experts representing civil society organizations governments and academia The workshop anticipated the implementation of the SSF Guidelines by looking at the diversity of existing organizations and collective action in SSFs discussing their strengths and weaknesses and proposing elements for a capacity development strategy to strengthen organizations and collective action in SSFs to reduce poverty while promoting responsible fisheries The workshop identified challenges and opportunities and examined alternative pathways on how organizations and collective action in fisheries can strengthen and be strengthened by the SSF Guidelines This publication summarizes the workshop results and intends to provide a useful reference document that will feed into the process of implementing the SSF Guidelines which should be endorsed by the FAO Committee on Fisheries

during its session in 2014 *Proceedings of the Gulf and Caribbean Fisheries Institute* Gulf and Caribbean Fisheries Institute,2008 **Local Commons and Democratic Environmental Governance** Takeshi Murota, Ken Takeshita, 2013 The rising tide of globalization poses a direct threat to the viability of small communities worldwide Such communities however are our greatest hope for sustainable environmental governance as they possess unparalleled ability to directly manage common pool resources Providing a much needed antidote in this age of globalization this volume advances the idea of collaborative governance as an integration of open and closed commons Taking into consideration the dimension of conflict resolution it studies examples of governance structures in various countries around the world to develop a new type of democracy towards multilevel environmental governance that involves the public private and commons spheres With contributions from researchers in a wide variety of disciplines this volume demonstrates through institutional and empirical analyses the essential role of local commons in providing an axis of resistance to increasing environmental devastation and social inequality towards creating a sustainable future for local communities as well as society at large Towards Integrated Assessment and Advice in Small-scale Fisheries Food and Agriculture Organization of the United Nations,2008 The document presents the principles and processes for integrated assessment and advice in small scale fisheries The first chapter discusses failures of conventional assessment and management approaches Chapter 2 presents the conceptual origins and principles of integrated assessment of small scale fisheries The framework is then introduced and places the assessment within the broader planning and management cycle The final chapter discusses the implementation of the IAA framework Publisher s description **Increasing the Contribution of Small-scale Fisheries to Poverty Alleviation and Food Security** Christophe Béné, Graeme Macfadyen, Edward Hugh Allison, Food and Agriculture Organization of the United Nations,2007 The third and main section of the document discusses ways of increasing the contribution of small scale fisheries to poverty alleviation and food security through nine main entry points First the paper revisits conventional fisheries policies and legislation and makes suggestions on how those can be made more pro poor Next the paper emphasizes the importance of capacity building and highlights how cross sectoral interventions can greatly improve the livelihoods of fish dependent communities The paper then proposes a series of broad pro poor or pro small scale fisheries principles before discussing in greater detail three of the main management instruments adopted in fisheries i property right approaches ii co management and iii protected areas The next two sub sections discuss markets and how to make them work for the poor and the important issue of pro poor financing systems and subsidies South African Journal of Marine Science ,2002 **Indigenous Use and Management of Marine Resources** Nobuhiro Kishigami, James M. Savelle, 2005 **Community Fisheries Management Handbook** Anthony Charles, Jennifer Graham, Arthur Bull, Gorsebrook Research Institute for Atlantic Canada Studies,2006 *Ecosystems and Human Well-Being* Millennium Ecosystem Assessment (Program). Sub-global Assessments Working Group,2005-12-14 One of the major innovations of the Millennium Ecosystem Assessment is

the incorporation of local and regional assessments 33 in all in a global portrait of the planet's health. It is the first global assessment of ecosystems to include not only a diversity of ecosystems but to draw on a wide range of cultural orientations and intellectual traditions including those of indigenous peoples. The Sub global Assessments Working Group integrated information from multiple sources and found that biophysical factors such as land use change, climate change and variability, pollution and invasive species have a significant effect on human well being across cultures. For example, in places where there are no other social safety nets, diminished human well being tends to increase immediate dependence on ecosystem services which can damage the capacity of those local ecosystems which in turn appears to increase the probability of natural disaster or conflict. Representing the baseline and framework for ongoing assessments of ecosystem and human well being on a variety of scales around the world, Multiscale Assessments provides students, researchers and policy makers with the most comprehensive methodology for assessing ecosystems at local, national and regional scales.
