**The Ascent of Man** ,1992

**The Teaching of Anthropology, Abridged Edition** David G. Mandelbaum,Gabriel W. Lasker,Ethel M. Albert,2023-11-15 This title is part of

UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate

the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high

quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published

in 1963

**The Human Species: An Introduction to Biological Anthropology** John Relethford,2009-08-28 This text

introduces physical anthropology the science of human biological evolution and variation Divided into four parts it addresses

the major questions that concern biological anthropologists What are humans Where are our origins How did we evolve and

are we still evolving and What does the future hold for the human species with an emphasis on hypothesis testing and the

relationship between biology and culture

**The Concept of Race in Natural and Social Science** E. Nathaniel

Gates,2014-05-01 Explores the concept of race The term race which originally denoted genealogical or class identity has in

the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be

applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated

were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of

this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social

control The articles in the series demonstrate that the classification of humans according to selected physical characteristics

was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the

propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the

interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the

world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple

perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds

Even if all the articles were available on campus chances are that a student would have to track them down in several

libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding

or simply missing This convenient set saves students substantial time and effort by making available all the key articles in

one reliable source Authoritative commentary The series editor has put together a balanced selection of the most significant works accompanied by expert commentary A general introduction gives important background information and outlines fundamental issues current scholarship and scholarly controversies Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field After reading the material even a beginning student will have an excellent grasp of the basics of the subject
