Manual Del Arquitecto Descalzo By Van Lengen Johan:

Manual del arquitecto descalzo Johan van Lengen, 2020-08-10 En la antigua edad los primeros arquitectos amasaban la tierra con sus pies para elaborar ladrillos hoy en día esa imagen está bastante alejada de nuestra realidad. Dado el cambio constante del mundo los materiales tradicionales de construcción se emplean con menos frecuencia y por lo tanto hay menos mano de obra con esos conocimientos. En este manual se ofrece una amplia gama de materiales y formas de construir una casa a partir de la combinación de técnicas tradicionales y modernas que contemplan el clima de las regiones donde se desea construir. Todo el texto está acompañado de dibujos que vuelven la información más amena y clara lo que lo convierte en un libro para arquitectos universitarios, autoridades de gobierno y técnicos pero también para todo aquel que quiera construir su propia casa.

Sanctuaries of Earth, Stone, and Light Gloria Fraser Giffords, 2022-08-23 Over nearly three centuries Jesuit, Franciscan, and Dominican missionaries built a network of churches throughout the new world of New Spain. Since the early twentieth century, scholars have studied the colonial architecture of southern New Spain, but they have largely ignored the architecture of the north. However, as this book clearly demonstrates, the colonial architecture of Northern New Spain, an area that encompasses most of the southwestern United States and much of northern Mexico, is strikingly beautiful and rich with meaning. After more than two decades of research both in the field and in archives around the world, Gloria Fraser Giffords has authored the definitive book on this architecture. Giffords has a remarkable eye for detail and for images both grand and diminutive. Because so many of the buildings she examines have been destroyed, she sleuthed through historical records in several countries and she discovered that the architecture and material culture of northern New Spain reveal the influences of five continents. As she examines objects as large as churches or as small as ornamental ceramic tile, she illuminates the sometimes subtle, sometimes striking influences of the religious, social, and artistic traditions of Europe from the beginning of the Christian era through the nineteenth century, of the Muslim countries ringing the Mediterranean from the seventh through the fifteenth centuries, and of Northern New Spain's indigenous peoples whose art influenced the designs of occupying Europeans. **Sanctuaries of Earth, Stone, and Light** is a pathbreaking book featuring 200 stunning photographs and over 300 illustrations ranging from ceremonial garments to detailed floor plans of the churches.

The Art of Natural Building Joseph F. Kennedy, 1999

Aproximaciones a la historia de la construcción en México Dirk Böhler, Francisco Omar Escamilla González, Leopoldo Rodríguez Morales, Mónica Silva Contreras, 2025-05-20 Dieciocho textos que presentan avances de investigación de historiadores, arquitectos, ingenieros, arqueólogos y restauradores a partir del análisis de obras específicas que van desde la época prehispánica hasta la construcción en los siglos XIX y XX.

Princípios bioclimáticos para o desenho urbano Marta Adriana Bustos Romero, 2013-01-01 O acelerado processo de urbanização apesar de muitos benefícios para a sociedade tem permitido que os interesses econômicos na maioria das cidades brasileiras e a falta de considerações ambientais nas decisões morfológicas urbanas venham a criar problemas diversos dentre os quais estão

desconforto térmico de los espacios urbanos. Principalmente en las últimas décadas hemos observado que las ciudades brasileñas en general están formadas y crecidas de un modo que tiene poco que ver con su contexto climático. Marta preocupa-se com isso e desenvolve os princípios bioclimáticos do planejamento urbano visando mostrar de que maneira devem ser definidas as morfologias urbano regionais para atender às exigências de conforto térmico e bem-estar das pessoas para diferentes condições de clima. E o faz de um modo claro e preciso adotando uma linguagem facilmente apreendida pelos leitores. Nesse sentido a sua dissertação de mestrado agora convertida em livro, uma grande contribuição na área. Deve ser leitura obrigatória por parte de todos aqueles que participam do processo de urbanização e que se preocupam com a qualidade de vida urbana. Inclusive pelos usuários para que instrumentalizados com essa nova linguagem possam conquistar o direito de se ter um ambiente saudável e confortável.

Experiencias de bioconstrucción: conceptos generales y visiones desde México Alejandra Caballero

Cervantes, Luis Fernando Guerrero Baca, 2022-01-26

En momentos como el presente, en el que los recursos naturales cada vez se vuelven más escasos y los daños al medio ambiente provocados por la actividad humana se han hecho irreversibles, se desarrolla una forma de habitar que busca recuperar los conocimientos ancestrales de la construcción y el equilibrio con el planeta. Bioconstruir significa ser parte de la trama de la vida, en donde cada una de las decisiones que tomemos al transformar nuestro entorno sea una forma de mejorarlo. Es una manera de integrar los edificios al clima y a las condiciones del lugar, a la cultura y a la comunidad, con el fin de reducir el consumo de recursos al mismo tiempo que se mejora la calidad de vida en toda la extensión de la palabra. Es generar procesos constructivos que propicien la convivencia, la cooperación y la armonía entre los seres humanos.
