*Number Systems* Mervin L. Keedy, 1965      *The Numeral Systems of Nigerian Languages* Ozo-mekuri Ndimele, S.L. Chan, 2016-04-30 The papers in this collection present the numeral systems of more than twenty Nigerian languages The papers mainly emanate from a workshop on the numeral systems of Nigerian languages organised by the Linguistic Association of Nigeria during its 23rd Annual Conference which was held at the University of Port Harcourt Nigeria The workshop arose from awareness created by Dr Eugene S L Chan on the need for Nigerian linguists to document this severely endangered but very important aspect of natural languages The quantum of mathematical computations addition multiplication subtraction or a combination of two or all of these involved in the numeral systems of Nigerian languages is remarkable The papers reveal that a variety of numeral systems do exist such as binary decimal incomplete decimal duodecimal quinary quaternary ternary mixed body part tally systems and much more The book is a resource about how different languages manipulate their numeral systems      *The Number Systems: Foundations of Algebra and Analysis* Solomon Feferman, 2003 The subject of this book is the successive construction and development of the basic number systems of mathematics positive integers integers rational numbers real numbers and complex numbers This second edition expands upon the list of suggestions for further reading in Appendix III From the Preface The present book basically takes for granted the non constructive set theoretical foundation of mathematics which is tacitly if not explicitly accepted by most working mathematicians but which I have since come to reject Still whatever one's foundational views students must be trained in this approach in order to understand modern mathematics Moreover most of the material of the present book can be modified so as to be acceptable under alternative constructive and semi constructive viewpoints as has been demonstrated in more advanced texts and research articles      *University of California Union Catalog of Monographs Cataloged by the Nine Campuses from 1963 Through 1967: Subjects* University of California (System).
