International Books in Print ,1997 <u>Damage Mechanics of Cementitious Materials and Structures</u> Gilles Pijaudier-Cabot,Frederic Dufour,2013-02-07 The book prepared in honor of the retirement of Professor J Mazars provides a wide overview of continuum damage modeling applied to cementitious materials It starts from micro nanoscale analyses then follows on to continuum approaches and computational issues The final part of the book presents industry based case studies The contents emphasize multiscale and coupled approaches toward the serviceability and the safety of concrete structures

Handbook of Conformal Mappings and Applications Prem K. Kythe,2019-03-04 The subject of conformal mappings is a major part of geometric function theory that gained prominence after the publication of the Riemann mapping theorem for every simply connected domain of the extended complex plane there is a univalent and meromorphic function that maps such a domain conformally onto the unit disk The Handbook of Conformal Mappings and Applications is a compendium of at least all known conformal maps to date with diagrams and description and all possible applications in different scientific disciplines such as fluid flows heat transfer acoustics electromagnetic fields as static fields in electricity and magnetism various mathematical models and methods including solutions of certain integral equations *Mathematical Reviews* ,2001

Numerical Methods in Approximation Theory, Vol. 9 D. Braess,L.L. Schumaker,2013-03-11 This book is the official proceedings of a conference on Numerical Methods in Approximation Theory which was held at the Mathematisches Forschungs institut in Oberwolfach during the week of November 24 30 1991 It contains refereed and edited papers by 20 of the 49 participants The book is dedicated to the memory of Prof Lothar Collatz who main tained a long and active interest in numerical approximation It is the ninth in a series of volumes published by Birkhiiuser resulting from conferences on the subject held at Oberwolfach and co organized by Prof Collatz We now briefly describe the contents of the book The paper of BASZEN SKI DELVOS and JESTER deals with blending using sine double series expan sions of functions defined on the unit square In addition to giving explicit error estimates for partial sums and for interpolating sine polynomials they also show that Boolean sums yield almost the same asymptotic error estimates as the conventional tensor product approach but with a reduced number of terms The paper of BEATSON and LIGHT discusses approximation by quasi interpolants which are sums of scaled translates of a one parameter family of functions They do not require reproduction of low degree polynomials but

nevertheless are able to give error bounds and analyze quasi interpolation based on Gaussians and exponentials BINEV and JETTER deal with multivariate interpolation using shifts of a single basis function They treat both gridded data and scattered data As examples they consider box splines and certain radial basis functions **Proceedings in Print** ,1982 *Meshfree Methods for Partial Differential Equations IV* Michael Griebel,Marc Alexander Schweitzer,2008-10-10 The numerical treatment of partial differential equations with particle methods and meshfree discretization techniques is a very active research field both in the mathematics and engineering community Due to their independence of a mesh particle schemes and meshfree methods can deal with large geometric changes of the domain more easily than classical discretization techniques Furthermore meshfree methods offer a promising approach for the coupling of particle models to continuous models This volume of LNCSE is a collection of the proceedings papers of the Fourth International Workshop on Meshfree Methods held in September 2007 in Bonn The articles address the different meshfree methods SPH PUM GFEM EFGM RKPM etc and their application in applied mathematics physics and engineering The volume is intended to foster this very active and exciting area of interdisciplinary research and to present recent advances and results in this field **Theory and Applications of Numerical Analysis** G. M. Phillips,Peter J. Taylor,1996-07-05 Theory and Applications of Numerical Analysis is a self contained Second Edition providing an introductory account of the main topics in numerical analysis The book emphasizes both the theorems which show the underlying rigorous mathematics andthe algorithms which define precisely how to program the numerical methods Both theoretical and practical examples are included a unique blend of theory and applications two brand new chapters on eigenvalues and splines inclusion of formal algorithms numerous fully worked examples a large number of problems many with solutions Computer Graphics and Geometric Modeling Using Beta-splines Brian A. Barsky,2013-12-20 *BIT.* ,1997 *Dissertationes mathematicae* ,1977 **Applied Problems of Radon Transform** Semen Grigor'evich Gindikin,1994 This collection is designed to acquaint readers with advances in Radon transforms carried out in the former Soviet Union The papers focus on mathematical problems related to applications of Radon transforms Some of the problems arose from practical tomography while others are theoretical problems originating in tomography The book should be of use to mathematicians working in integral geometry and mathematical problems of tomography as well as scientists who work on inverse problems and their computer realization *Mathematical Methods for Curves and Surfaces* Tom Lyche,Larry L. Schumaker,2001 This volume contains a carefully refereed and edited selection of papers that were presented at the Oslo Conference on Mathematical Methods for Curves and Surfaces in July 2000 It contains several invited surveys written by leading experts in the field along with contributed research papers on the most current developments in the theory and application of curves and surfaces Page 4 de la couverture *Communications in Applied Analysis* ,1998 **Revue Roumaine de Mathématiques Pures Et Appliqueés** ,1986 Guide to Available Mathematical Software Ronald F.
