Introduction to Nursing Informatics Kathryn J. Hannah, Marion J. Ball, Margaret J.A. Edwards, 2013-04-17 This series is directed to health care professionals who are leading the transformation of health care by using information and knowledge. Launched in 1988 as *Computers in Health Care* the series offers a broad range of titles some addressed to specific professions such as nursing medicine and health administration others to special areas of practice such as trauma and radiology. Still other books in the series focus on interdisciplinary issues such as the computer based patient record electronic health records and networked health care systems. Renamed *Health Informatics* in 1998 to reflect the rapid evolution in the discipline now known as health informatics the series will continue to add titles that contribute to the evolution of the field. In the series eminent experts as editors or authors offer their accounts of innovations in health informatics. Increasingly these accounts go beyond hardware and software to address the role of information in influencing the transformation of health care delivery systems around the world. The series also will increasingly focus on peopleware and the organizational behavioral and societal changes that accompany the diffusion of information technology in health services environments. *National Institutes of Health Annual Report of International Activities* John E.
