Explanations are based on general biology; readers do not need a chemistry background. Chapters contain accepted information on nutrition but controversial issues also are included. Evidence is presented for and against current nutritional claims such as the relationship of additives, allergies or sugar to hyperactivity. Chapters include food features which relate nutrition information to practical suggestions for shopping, eating out in restaurants and food preparation. Self study assignments allow readers to evaluate their own diet. In addition to basic nutrition information, food labeling, additives and nutrition throughout the life cycle are discussed.
