book have been selected to illustrate the process by which particular forms of English usage are erected and validated as correct and standard. At the same time the texts demonstrate how a certain group of people and certain sets of cultural practices are privileged as correct standard and central. Covering a period of three hundred years these writers who include Locke Swift Webster James Newbolt and Marenbon wrestle with questions of language change and decay correct and incorrect usage what to prescribe and proscribe. Reread in the light of recent debates about cultural identity how is it constructed and maintained what are its effects these texts clearly demonstrate the formative roles of race class and gender in the construction of proper Englishness. Tony Crowley's introductory material breaks new ground in rescuing these texts from the academic backwater of the history of the language and in reasserting the central role of language in history.
