Technology for a Quieter America National Academy of Engineering, Committee on Technology for a Quieter America, 2010-10-30. Exposure to noise at home, at work, while traveling, and during leisure activities is a fact of life for all Americans. At times noise can be loud enough to damage hearing, and at lower levels it can disrupt normal living, affect sleep patterns, affect our ability to concentrate at work, interfere with outdoor recreational activities, and in some cases interfere with communications and even cause accidents. Clearly, exposure to excessive noise can affect our quality of life. As the population of the United States and indeed the world increases and developing countries become more industrialized, problems of noise are likely to become more pervasive and lower the quality of life for everyone. Efforts to manage noise exposures to design quieter buildings, products, equipment, and transportation vehicles, and to provide a regulatory environment that facilitates adequate, cost effective, sustainable noise controls, require our immediate attention. *Technology for a Quieter America* looks at the most commonly identified sources of noise, how they are characterized, and efforts that have been made to reduce noise emissions and experiences. The book also reviews the standards and regulations that govern noise levels and the federal, state, and local agencies that regulate noise for the benefit, safety, and wellness of society at large. In addition, it presents the cost benefit trade offs between efforts to mitigate noise and the improvements they achieve, information sources available to the public on the dimensions of noise problems and their mitigation, and the need to educate professionals who can deal with these issues. Noise emissions are an issue in industry, in communities, in buildings, and during leisure activities. As such, *Technology for a Quieter America* will appeal to a wide range of stakeholders, the engineering

community the public government at the federal state and local levels private industry labor unions and nonprofit organizations Implementation of the recommendations in Technology for a Quieter America will result in reduction of the noise levels to which Americans are exposed and will improve the ability of American industry to compete in world markets paying increasing attention to the noise emissions of products   **Expressing Silence** Natsuko Tsujimura,2022-03-03 In Expressing Silence Where Language and Culture Meet in Japanese Natsuko Tsujimura discusses how silence is conceptualized and linguistically represented in Japanese Languages differ widely in the specific linguistic and rhetorical modes through which vivid depictions of silence are achieved In Japanese sounds in nature evoke silence and onomatopoeia plays an important role in simulating silent scenes These linguistic mechanisms mediate the perception of the symbiotic relationship between sound and silence a perception deeply embedded in the Japanese cultural experience Expressing Silence brings the tools of both linguistic and cultural analysis in examining the remarkably rich array of representations of silence in Japanese language and culture finding that depictions of silence through language cannot be understood without exploring what sound or silence mean to the speakers   *Abraham Lincoln and Men of War-times* Alexander Kelly
