Man Who Found The Missing Link:

The Man who Found the Missing Link Pat Shipman,2002 Born eighteen months after the first Neanderthal skeleton was found and a year before Charles Darwin published The Origin of Species Eugene Dubois vowed to discover a powerful truth in Darwin's deceptively simple ideas There is a link he declared a link as yet unknown between apes and Man It takes a brilliant writer to elucidate a brilliant mind and Pat Shipman shines as never before The Man Who Found the Missing Link is an irresistible tale of adventure scientific daring and a strange and enduring love and it is true *The Man who Found the Missing Link* Pat Shipman,2002-07-04 Pat Shipman's latest book is a scientific biography written like a novel It tells the story of one of the greatest scientists at the turn of the century a Dutchman called Eugene Dubois now largely forgotten but the man whose discovery of the missing link altered our view of human origins As a young man he decided that the most important contribution a man could make to science would be to find the missing link It would be the proof of Darwinian evolution then still controversial He deduced where the missing link should be and found the fossil now known as homo erectus in Java in 1891 Shipman uses a fascinating range of letters diaries and photographs to tell the story of how Dubois life and career exploded across the world in the 1890s *Frozen in Time* Michael Oard,Oard Michael,2004 Earth's past is littered with the mysterious and unexplained the pyramids Easter Island Stonehenge dinosaurs and the list goes on and on as science looks for clues to decipher these puzzles One such mystery surrounds the now extinct creature called the woolly mammoth Author and meteorologist Michael Oard has studied the mammoth and its equally mysterious time period the Ice Age for many years and has come to some fascinating conclusions to help lift the fog engulfing the facts Some of the questions he addresses include What would cause the summer temperatures of the northern United States and European to plummet more than 50 degrees Fahrenheit Why did mammoths become extinct across the entire earth at the same time as many other large mammals Why are the mammoth carcasses found generally in standing positions How could large lakes exist in what are today very dry desert like places What was the source of the abnormal of moisture necessary for heavy snow What caused the cold summer temperatures and heavy snowfall to persist for hundreds of years In logical progression many other Ice Age topics are explained including super Ice Age floods ice cores man in the Ice Age and the number of ice ages This is one of the most difficult eras in geological history for a uniformitarian scientist one who believes the earth evolved by slow processes over millions of years to explain simply because long ages of evolution cannot explain it Provided here are plausible explanations of the seemingly unsolvable mysterious about the Ice Age and the woolly mammoths *Frozen in Time*
