**Organizational Innovation** Gerald Hage, 2018-12-20 Published in 1998 In the past year the 300 largest global companies increased their research budgets by an average of 12 per cent Governments now measure how technologically advanced they are as they worry about their trade balances and unemployment Many public sector organizations for example hospitals universities and welfare agencies are struggling to keep up with the rate of technological progress The selections in this book provide a number of insights on how private firms can be more innovative and public sector organizations can keep up with rapid technological change They

emphasize both radical and incremental innovations and both product and process innovation. In particular, the advanced manufacturing technologies so central to Piore and Sabel's Second Industrial Divide receive a great deal of attention. Finally, the consequences of innovation are the focus of the last section.

**Technological Change & Labour Relations** Muneto Ozaki, 1992. A study which looks at the reciprocal influence of technological change and labour relations and includes case studies from six industrialized market economy countries as well as a comparative chapter. The book focuses on the introduction of microelectronic technology in machinery manufacturing, banking and printing to examine how workers participated in the changeover and how labour relations in the enterprises studied were affected by the new technology.

*Proceedings of the International Conference on Business and Management Dynamics 2016: Sustainable economies in the information economy* Joy E. Akahome, Michael Twum-Darko, Cyril Ogbokor, Nyaniso Mfusi Zonke, T. Sethibe, R. Steyn, Esme Mohammed, Renier Steyn, L.B. Nguenang, Mamorena Lucia Matsoso, Henry N. Ozuru, Julius Akaba, Patient Rambe, Edem Korku Agbobli, Henri-Vincent Ndjave-Ndjoy, Regis Muchemwa, Andre de la Harpe, Konosoang Mpiti, Ayodeji Afolayan, 2016-12-31 Cape Town South Africa 7 Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town. As grey literature, the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates.

**Methodology** The methodology used varies from researcher to researcher but are suitable for the studies conducted. Thus, on the one hand, studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data. On the other hand, studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data. However, there were some academic papers which used mixed methodology because of the nature of the study. Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology.

**Contribution made to scholarship** The articles come from individual researchers and each article in the proceedings is unique. Mostly, there is no general argument leading from one contribution to the next. However, it is interesting to note that in the area of economic performance, it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth. With regard to human capital development, papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic. Thus, the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors. Furthermore, it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such, new strategies are needed to reinforce efforts to nurture and invigorate

the institutionalisation of knowledge sharing within an organisation With regard to technology and big data impact on organisational performance it was evident that system performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness Target audience The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics information management business education development studies social sciences and technology It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment *INTERNATIONAL JOURNAL OF PRODUCTION ECONOMICS: MANUFACTURING SYSTEMS, STRATEGY & DESIGN*, 1987 *Management Strategies for Information Technology* Michael J. Earl, 1989 This analytical text examines how information technology has become a strategic issue for many organizations and shows how IT can be exploited for strategic advantage The early chapters suggest both why and how exploitation of IT should be connected to business strategy formulation and examine some traditional problems of information systems management from this strategic perspective Subsequent chapters re examine some traditional problems of information systems management from this strategic perspective **Prospects for**
