Managing Virtual Teams:

Managing Virtual Teams Debbie D. DuFrene, 2011-11-23 Virtual teams are an integral part of today's global business environment. Traditional face to face communication is frequently being replaced with technology mediated communication methods including phone email fax synchronous chat programs and videoconferencing. While virtual teams offer various advantages to organizations and individuals in flexibility and the ability to overcome geographic distance, they face unique challenges. Virtual teams are often made up of members of various cultures with diverse communication styles. Men and women also tend to behave differently in virtual environments. Challenges occur in the forming, storming, norming, and performing phases of team development, and virtual teams must be able to cope effectively with those obstacles if they are to be successful and reach their potential. Team participants should be selected carefully for various personal characteristics that help assure success and be trained in how to be effective virtual team members. Various team strategies can be implemented to improve effectiveness and satisfaction of virtual team members.

Managing Virtual Teams Martha Haywood,1998 The software serves as an assessment tool to help make the distributed team more effective *Managing Virtual Teams. Building Trust and Managing Conflicts* Lukas Thielen,2019-02-25 Essay from the year 2017 in the subject Business economics Business Management Corporate Governance grade 2 0 International University of Applied Sciences language English abstract At the turn of the century globalisation and the use of communication technologies enabled organizations to alter their organization

based structures from traditional to virtual settings. The use of agile teams that can be arranged on the fly has expanded considerably in response to the competitive, complex and challenging business environment. Traditionally teams operated in face to face settings but with advances in information and communication systems, virtual collaboration has become commonplace. Virtual teams have plenty of advantages. Companies can bring together their best global talents at low cost while offering their employees great flexibility and autonomy. Since team members span multiple time zones and are able to work parallel instead of sequential, organizations are able to significantly reduce their response time and time to market. It is fair to say that the digital evolution is transforming the future of work. But the benefits of virtual collaboration come with challenges that need to be mastered by organizations. Project coordination, building relationships, establishing trust and achieving effective teamwork are only few aspects that differ from conventional teams when considered in detail. Teams with multi-cultural backgrounds that are geographically dispersed and virtually composed have been in practice and studied for more than three decades. Yet managers still struggle with how to get them perform and collaborate properly. Bad communication, non-existing trust and conflicts seem to be the main causes of failure in virtual collaboration. The purpose of this research essay is to understand the characteristics of managing virtual teams by analysing relevant literature focused on the areas of building trust and managing conflicts in particular. The essay aims to examine the impact and relation that trust and conflict management have with the performance of a team and the group's cohesion.
