**The Regulatory Craft** Malcolm K. Sparrow,2011-01-01

The Regulatory Craft tackles one of the most pressing public policy issues of our time the reform of regulatory and enforcement practice Malcolm K Sparrow shows how the vogue prescriptions for reform centered on concepts of customer service and process improvement fail to take account of the distinctive character of regulatory responsibilities which involve the delivery of obligations rather than just services In order to construct more balanced prescriptions for reform Sparrow invites us to reconsider the central purpose of social regulation the abatement or control of risks to society He recounts the experiences of pioneering agencies that have confronted the risk control challenge directly developing operational capacities for specifying risk concentrations problem areas or patterns of noncompliance and then designing interventions tailored to each problem At the heart of a new regulatory craftsmanship according to Sparrow lies the central notion pick important problems and fix them This beguilingly simple idea turns out to present enormously complex implementation challenges and carries with it profound consequences for the way regulators organize their work manage their discretion and report their performance Although the book is primarily aimed at regulatory and law enforcement practitioners it will also be invaluable for legislators overseers and others who care about the nature and quality of regulatory practice and who want to know what kind of performance to demand from regulators and how it might be delivered It stresses the enormous benefit to society that might accrue from development of the risk control art as a core professional skill for regulators
