Managing Information Services:

Managing Information Services Jo Bryson, 2011 This third edition of Jo Bryson's highly regarded *Managing Information Services* has been thoroughly revised with an emphasis on managing for a sustainable future. Libraries and information services face uncertain times and this new edition tackles the challenges of planning and managing change, future proofing for tomorrow and leading the transformation to a sustainable future. The text also addresses the integration of information services including librarianship, records management and ICT. Essential reading for information students, this text also serves as a comprehensive and detailed reference on the key management topics for information service managers.

Managing Information Services Jo Bryson, 2006 This new edition of *Managing Information Services* has been significantly revised and restructured to reflect the need for libraries and information services to manage the transformation necessary to become more relevant to the knowledge age's dynamic customer-centred environment. It reflects the move from managing physical assets to exploiting knowledge technology and innovation, new models of learning, global mobile communication and new delivery mechanisms with a focus on relationships. Introductory sections on management and strategic influences emphasise the importance of knowledge management skills, teamworking, corporate responsibility and customer satisfaction as a driver for change. A new section on corporate governance has been added that includes managing different forms of capital and there is expanded coverage of investment security, risk management and business continuity. Maintaining a competitive advantage through service quality and multiple delivery channels is another theme found throughout the book.

comprehensive and yet sufficiently detailed reference on the key management subjects for information service managers

Managing Information Services Jo Bryson, 2016-05-05 This fourth edition of Jo Bryson's highly regarded *Managing Information Services* has been thoroughly revised with an emphasis on innovation. Operating in a digital era, libraries must innovate to survive and grow. This means librarians having radical ideas which challenge the status quo, shifting strategic directions to change the way services are managed and developing new skills and knowledge. Challenges include developing new uses for floorspace where shelving is being replaced by mobile networking and new practices and procedures for managing new products such as e-books and self-service. Libraries can achieve long-term sustainability by information managers having more creative responses and developing innovative thinking. Essential reading for information students, this text also serves as a comprehensive and detailed reference on the key management topics for information service managers.
