Trauma, cirugía de urgencia y cuidados intensivos. Tercera edición Aurelio Rodríguez, Ricardo Ferrada, 2023-03-03

PREFACIO Los temas tratados en este libro Trauma cirugía de urgencia y cuidados intensivos plantean un reto importante por muchas razones Obviamente sería inapropiado tratar de analizarlas en el prefacio Me gusta sin embargo alertar al lector sobre algunos aspectos básicos que reflejan el perfil del acceso a la salud ofrecido a la población de los países involucrados y las características de la atención médica proporcionada El trauma sigue siendo un reto en todos los países de América y particularmente en América Latina donde los homicidios son extremadamente frecuentes y afectan especialmente a la población más joven Todas las iniciativas para dar a conocer el impacto del trauma y para promover la prevención y mejorar el servicio han sido ineficaces lo que demuestra claramente que el trauma sigue siendo visto por los funcionarios públicos y políticos como un fenómeno accidental Es interesante observar que por el contrario recursos altamente significativos han sido invertido en las reas del cáncer y de las enfermedades cardiovasculares enfermedades que en la mayoría de los casos nada más representan mecanismos fisiológicos del final de la vida Hoy día al visitar las unidades de cuidados intensivos es común que las pocas camas disponibles se encuentren ocupadas por pacientes de edad avanzada a menudo personas con enfermedades incurables y tratados en unidades con equipamiento y recursos pobres Se incentiva la inutilidad médica Se invierten enormes recursos para permitir que los pacientes sobrevivan unas pocas semanas más al costo de una calidad de vida totalmente inaceptable El acceso a los cuidados paliativos es visto a menudo como una falta de respeto al paciente y su familia Las causas más importantes de tales distorsiones inaceptables se pueden agrupar en los siguientes aspectos Inicialmente se debe considerar el cambio del perfil de la población Cada año aumenta la proporción de personas mayores y en consecuencia se incrementa el número de pacientes con trastornos neurodegenerativos los candidatos a la muerte por cáncer y enfermedades cardiovasculares que a pesar de los avances de diagnóstico y terapéuticos siguen siendo incurables
