Nutrition, Well-Being and Health Jaouad Bouayed,Torsten Bohn,2012-02-23 In our modern society expectations are high also with respect to our daily diet In addition to being merely nutritious i e supplying a variety of essential nutrients including macro nutrients such as proteins or micro nutrients such as minerals and vitamins it is almost expected that a good diet offers further advantages especially well being and health and the prevention of chronic diseases which are as we generally tend to grow older and older becoming a burden to enjoying private life and to the entire society These additional qualities are often sought in diets rich also in non nutritive components such as phytochemicals In contrast to drugs which are taken especially to cure or ameliorate diseases it is expected that a healthy diet acts in particular on the side of prevention allowing us to become old without feeling old In the present book rather than trying to give an exhaustive overview on nutritional aspects and their link to well being and health selected topics have been chosen intended to address presently discussed key issues of nutrition for health presenting a reasonable selection of the manifold topics around diet well being and health from the antioxidants polyphenols and carotenoids aroma active terpenoids to calcium for bone health back to traditional Chinese Medicine **Nutrition in Health and Disease** Lenna Frances Cooper,1928 **E-book on**
