Narducci, 1981 **Multidimensional Modulations in Optical Communication Systems** Silvello Betti, Pierluigi Perrone, Giuseppe Giulio Rutigliano, 2021-08-19 This book analyzes novel possibilities offered to the telecommunication engineer in designing tomorrow's optical networks. Currently, optical and optoelectronic technologies make possible the realization of high performance optical fiber communication systems and networks with the adoption of WDM configurations and both linear and nonlinear optical amplifications. The last step for increasing network throughput is represented by the implementation of multidimensional modulation formats in coherent optical communication systems which enable increasing the bit rate channel toward 400 Gbit/s channel and beyond. Following this approach, the main emphasis is placed on innovative optical modulations. *Multidimensional Modulations in Optical Communication Systems* is an essential guide to the world of innovative optical communications from the point of view of growing capacity and security. It guides researchers and industries with the aim of exploring future applications for optical communications. *Proceedings of the London Mathematical Society* London Mathematical Society, 1909. In the context of single-carrier modulation, it describes DSP for linear and nonlinear optical fiber communication systems, discussing all optical Nyquist modulation signal generation and processing and how to use probabilistic and geometrical shaping to improve the transmission performance. For multi-carrier modulation, it examines DSP-based OFDM signal generation and detection and presents 4D and high-order modulation formats. Lastly, it demonstrates how to use artificial intelligence in optical fiber communication. As such, it is a useful resource for students, researchers, and engineers in the field of optical fiber communication. **Active and Passive Optical Components for WDM Communications**, 2003 *Optics in Four Dimensions 1980* Machado, Narducci, 1998-04-03 **Encyclopedia of Modern Optics** Bob D.
