Nature Inspired Computing for Data Science Minakhi Rout, Jitendra Kumar Rout, Himansu Das, 2019-11-26. This book discusses the current research and concepts in data science and how these can be addressed using different nature-inspired optimization techniques. Focusing on various data science problems including classification, clustering, forecasting, and deep learning, it explores how researchers are using nature-inspired optimization techniques to find solutions to these problems in domains such as disease analysis and health care, object recognition, vehicular ad hoc networking, high-dimensional data analysis, gene expression analysis, microgrids, and deep learning. As such, it provides insights and inspiration for researchers to want to employ nature-inspired optimization techniques in their own endeavors.

Cloud Computing for Geospatial Big Data Analytics Himansu Das, Rabindra K. Barik, Harishchandra Dubey, Diptendu Sinha Roy, 2018-12-11. This book introduces the latest research findings in cloud, edge, fog, and mist computing and their applications in various fields using geospatial data. It solves a number of problems of cloud computing and big data such as scheduling, security issues using different techniques which researchers from industry and academia have been attempting to solve in virtual environments. Some of these problems are of an intractable nature, and so efficient technologies like fog, edge, and mist computing play an important role in addressing these issues. By exploring emerging advances in cloud computing and big data analytics and their engineering applications, the book enables researchers to understand the mechanisms needed to implement cloud, edge, fog, and mist computing in their own endeavours and motivates them to examine their own research findings and developments.
